MOLINES' BOOMING

Moline—Illinois—East Moline

Two cities directly adjoining one another, one city in every respect, except each has its own municipal government and each its own business section. An election to merge these two cities has been called for December 15, 1925.

The Molines, with a population of 44,000 people, one of the largest manufacturing centers in the middlewest, are on the boom and today enjoying prosperity as they have not done since the big boom year of 1920. The business depression at that time hit the Molines hard and they stayed "hit" for some time. But the present year brought the happy turn and today the Molines' 85 factories are working, most of them full time and full force. And the Molines' prosperity should be here to stay, for the 85 factories are today in better financial condition and on a better industrial footing than ever before, and with the farmers of this country "back on their feet" and in need of agricultural implements, and with foreign conditions on a surer foundation than any time since the World War, everything looks bright and rosy for the Molines.

THINGS ADVERTISERS LIKE TO KNOW

The Molines have 85 industrial plants manufacturing 60 different articles and the 8,200 workers in these plants receive annually in wages $14,000,000. *A condition quite unusual in industrial centers exists in that 84% of all houses are owned by the occupants.* In six banks there are 44,000 depositors. Many of these depositors are people from nearby towns who make the Molines their banking and business headquarters. The Molines' trading territory extends 40 miles north and east and makes a trading population of 150,000 people. The 88 miles of paved streets are a big boom for business and also attract thousands of automobile pleasure seekers. The Molines' 7,000 automobiles convey a good share of the workers to and from work, but those who wish or prefer to use street cars have 30 miles of as good street railway equipment as any city in the country.

MOLINE DAILY DISPATCH

Is the only daily newspaper published in the city and its coverage is complete. 80% of Dispatch circulation is within the city limits and a big share of the remaining 20% in the suburban territory 40 miles north and east.

Manufacturing Establishments: 6.

Special Information: Is one of the few cities formerly closely allied with the liquor industries which has not suffered by prohibition. Ideal location for factory purposes, due to rail facilities and prospects of enlarged river transportation on the Illinois River under deep waterways projects. Steady growth in population, which, in spite of construction of over 700 new homes in three years, causes a scarcity of houses and forcing about 1,500 workers to live in Peoria and nearby small towns.

Residential Features: Great majority of residents own their own homes. Only three apartments in entire city. Even the several sections occupied by the poorer paid workers are well kept. City is almost entirely paved and well kept. Blocks not now paved are to be paved during next year. Two new "additions" were plotted this year. One more will be in the spring. Is on completed hard road

PEORIA
"Illinois' Great Central Market"
One of the
100,000
Group of American Cities

Peoria and its trade territory is one of the major markets of America and is the natural gateway between the vast producing area of the West and the great markets of the East.

Peoria shows a buying power of $732 per capita in its trade radius, as compared to $712 in Chicago.

Peoria homes having annual incomes of $1,800.00 are 31 per cent of the total, as compared to 13 per cent in the United States as a whole.

Value of output, more than $200,000,000
Number of wage earners 25,000
Annual payroll $40,000,000

Peoria is one of The 100,000 Group of American Cities and is included in the 336 page book published by this group, entitled, "A Study of 81 Principal American Markets." (See pages 212, 213, 214, 215.)

Don't Take Our Word For It—

Ask the buyer and the consumer of your product which Peoria newspaper should carry your advertising in this rich territory. A surprising majority will choose

The Peoria Star

"The Newspaper People Believe In"

WHY?

Most Effective Circulation

The A. B. C. figures prove THE STAR'S dominance in the city of Peoria and in Peoria's trading territory.

THE STAR has 29% more city circulation than the other evening paper and 210% more than the morning paper. Of THE STAR'S total net paid circulation more than 84% is concentrated in Peoria and Peoria's trading territory.

Greatest Reader Confidence

It has ever been the editorial policy of THE STAR to avoid rank sensationalism; to publish plain truths; to refrain from publishing "EXTRAS" unless warranted by an event of extraordinary news interest; to value above all else the confidence of its readers. THE STAR has worked for and earned the right to be truthfully called "The Newspaper People Believe In."

Genuine Co-operation

THE STAR gives advertisers genuine co-operation in merchandising their products in this fertile field.

THE STAR maintains a merchandising department for the sole purpose of assisting advertisers in gaining and maintaining satisfactory distribution in Peoria and in Peoria's trading territory. The services of this department are available at all times to advertisers contemplating campaigns in "The Heart of Central Illinois."

Sell your used machinery through Editor & Publisher

the fact that the NEWS SENTINEL, of Fort Wayne, Indiana, during the month of October carried the largest volume of local display copy ever carried by any Fort Wayne daily in one month, is interesting only in that it reflects the fact that those merchants who have products to SELL to the Fort Wayne trade and who know where results come from choose the NEWS SENTINEL.

it is not true that in Fort Wayne there is only ONE newspaper. There are two newspapers.

but—and that "but" is a big word—local merchants ranging from department store owners and managers to grocery keepers have found that ONE newspaper delivers the maximum results per dollar invested in advertising space.

these local merchants have estimated, guessed and figured their advertising appropriations from every angle and it must be interesting to conscientious space buyers that the verdict as to the Fort Wayne newspapers so unanimously has been returned by the local merchants, "in Fort Wayne it is the NEWS SENTINEL".

of course the NEWS SENTINEL in October carried the bulk of the national advertising released in Fort Wayne and reference is made to the local lineage only to give additional assurance that agency space buyers have made no mistake in listing the NEWS SENTINEL.

This is the Indianapolis Radius

—a 2,000,000 market created for and delivered to advertisers by The Indianapolis News.

INDIANAPOLIS is the political, commercial, financial, social, educational *capital* of Indiana and the exact center of the state. Geography and market conditions made the Indianapolis Radius possible. But The Indianapolis News *created* the Indianapolis Radius by living up to its destiny, by being, these fifty-six years, Indiana's greatest *news*paper.

The Indianapolis Radius is the zone of concentrated circulation and influence of The Indianapolis News.

Unique in America is the degree of penetration of The News, an evening newspaper, in this marvelously rich and compact market. It is natural for a morning newspaper to enjoy wide circulation through its trade area. Here is an evening newspaper, distributed by its fleet of trucks to farm and city homes within the seventy-mile radius *at the same hour it is delivered by carrier a few blocks away from the plant.*

Shrewd space buyers appreciate the unparalleled opportunity of such a market so completely and economically covered at one advertising cost.

In 1923 and again in 1924, advertisers elected to carry more advertising in The Indianapolis News in its six issues a week than in all other Indianapolis newspapers combined in their thirteen issues a week. Yet October, 1925, was the largest single month in the fifty-six year history of The News.

Results! The advertising linage is proof of it. The character of the market, and the unique coverage of The News make it possible.

Get the NEW Indianapolis Facts

The Year 1925 Brought a Distinct Change in the Indianapolis Situation. It Is NOT a ONE Paper Market.

Consider These Facts:

1. The Indianapolis Times is the FASTEST GROWING newspaper in Indiana.
2. Local advertising INCREASE 1,567,234 lines in 10 MONTHS of 1925.
3. Circulation INCREASE 6,796 (14.9%) March 31 to September 30, 1925. All other Indianapolis newspapers LOST.
4. Circulation and advertising INCREASES obtained SOLELY upon MERIT as NEWSPAPER and ADVERTISING MEDIUM.
5. The Times is NECESSARY in EVERY plan to COVER Indianapolis.

The results of the house-to-house canvass made by the United States Postoffice Department show conclusively that 110,448 families live in the Indianapolis city carrier delivery limits—nearly 30,000 more than the estimated number which formerly has been the basis for calculation.

Here is ACTUAL COVERAGE

Homes in Indianapolis "City Circulation" boundaries.....		110,448
Indianapolis Times City Dealer and Carrier Circulation.....	26,484	
Other Evening Paper City Dealer and Carrier Circulation.....	78,334	104,818

The combined Carrier and Dealer circulation of the two Indianapolis evening newspapers give 95% coverage of Metropolitan Indianapolis.

It is now an established fact that The Times is necessary in every plan to fully cover Indianapolis. Local merchants know this, and national advertisers entering this rich market should get the newest information from

Indianapolis (con't)

30th and Northwestern, 38th and College, and others.

Trading Area: The trading area is that territory within a radius of 75 miles. Because of the net work of electric interurban lines, steam roads, and improved State highways, Indianapolis has a transient population of over 20,000 daily. This is based on the number of passengers carried by the transportation companies, including bus lines. Many thousands more undoubtedly arrive in their own automobiles. It is because of this, that the volume of retail business done is many times larger than the actual city population might produce.

Wholesale Houses: Groceries, 17; meats, 24; fruits, 21; hardware, 5; dry goods, 5; confectioners, 33; cigars and tobacco, 15; jewelry, 5; plumbers, 7; drug, 5; auto accessories, 7.

Why Not the Buyers of Grant County as Well as Marion?

Why not concentrate on a buying territory of 60,000 population when it can be done at the same expense of reaching 30,000.

This can be accomplished only through a newspaper that has a circulation both in the city and country—the Farmer wants the Leader-Tribune because it reaches him the morning of publication—the Citizen of the small towns also is a subscriber because in Grant County no morning Metropolitan paper printed later than the early mail editions of the night before reaches him.

This is the reason the

Theatres: Moving Pictures, 4; Vaudeville, 2; Miscellaneous (Auditoriums, etc.), 6. Total number of seats, 7,000.

Location: On north bank of Ohio River. Served by Baltimore & Ohio, Pennsylvania, Monon, Southern and Interstate Public Service Interurban, 2 lines. Connected by the Kentucky & Indiana Railroad with five additional railroads—Louisville & Nashville, Illinois Central, Louisville, Henderson & St. Louis, Chesapeake & Ohio, and Big Four. Excellent bus and truck service to western and central parts of state.

Principal Industries: Iron and steel, woodworking, veneer mills, furniture factories, tanneries, machine shops, boat building, packing houses, canning factories, 2 fertilizer factories, 2 clothing factories, shirt factory, 2 stove foundries, national home and chain works, tobacco warehouses, printing, etc.

Manufacturing Establishments: 115. Leading firms: Wood-Mosaic Co., Ohio Falls Iron Co., New Albany Veneering Co., Indiana Panel Co., Pointer Stove and Range Co.; Anchor Stove and Range Co. Total value of yearly output of factories estimated at $20,000,000.

Special Information: The location of this city on the Ohio River, with the only vehicle and automobile bridge on the Ohio, west of Cincinnati, makes New Albany the gateway between the North and South. New Albany is the southern terminus of Indiana's State road No. 1, concrete, running from Michigan to the Ohio River. Also of state road No. 5 and state road No. 16, and the Wonderland Way running from the Atlantic to the Pacific Ocean. New Albany is the center of southern Indiana's most historic and picturesque scenery. Gravel cement, sand and lime distribution center. 6,000 passenger autos, 1,500 trucks. Jackson Highway, Dixie Highway, Midland Trail and Daniel Boone Trail all pass through this city.

Residential Features: Mostly one- and two-family houses. Private homes predominate. There are a number of flats and apartment houses. One of the most delightful residential sections in southern Indiana is located just west of the city on Silver Hills, overlooking the Ohio River and valley.

Retail Shopping Section: Extends four squares on Oak St., five squares on Spring St., five squares on Market St., and five squares on State St. Each of these streets has practically as much additional retail sections in the eastern end of the city, with Vincennes St. as the center with quite a good many stores intervening. Vincennes St. is a retail shopping section for 10 squares. There are also a number of smaller neighborhood sections in the different parts of the city, with the usual number of groceries, meats, drugs and confectionery stores.

Trading Area: Extends about forty miles southwest, west, northwest, north and northeast and about ten miles east. On the south N. A. is shut off by the Ohio River, but is attracting large amount of trade from the city of Louisville. Business is secured from these great distances because of the size of our city and the dominating character of its wholesale and retail stores, being the best in southern Indiana south of Indianapolis.

Rensselaer (con't)

Manufacturing Establishments: 10. Iroquois Roller Mills, Rensselaer Cement Products, Babcock Construction Co. (crushed stone), Jasper County Creamery, Rensselaer Creamery, Rensselaer Ice Cream Co., Farmers' Grain Co., Babcock Grain Co. Annual output, $1,000,000.

Special Information: Rensselaer is principally a farming community, growing grain crops, but eventually will become a truck farm and dairy country due to the nearness of the great Calumet industrial district. It is now a well developed retail trading center, being the county seat and largest town within 40 miles. The good roads of this and nearby counties add materially to make Rensselaer a trading center.

Residential Features: All private homes, no flats or apartment buildings. Fine homes in all parts of the city.

Retail Shopping Section: Three blocks on Washington Street and two blocks on Van Rensselaer Street. Four neighborhood grocery stores with a small business section on north side of town.

Trading Area: Extends over practically all of Jasper County and into adjoining county, reaching about 16 miles west, 12 miles south, 12 miles north and 10 miles east. People come from greater distances on the north, but with less frequency. A conservative estimate places Rensselaer 40 miles from the nearest competing shopping center of size.

Number of Retail Outlets for Nationally Advertised Products: Passenger automobile agencies, 13; commercial automobile agencies, 5; automobile accessories, 11; automobile tire agencies, 14; bakers, 2; cigar stores and stands (including hotels), 22; confectioners (including hotel stands), 2; dressmakers, 4; druggists, 3; dry goods, 3; department stores, 2; electrical supplies, 5; florists, 1; furniture, 2; electrical supplies, 5; florists, 1; furniture, 2; garages (public), 5; grocers, 11; hardware, 2; jewelry, 3; meat markets, 3; men's furnishings, 2; men's clothing, 2; merchant tailors, 3; milliners, 2; opticians, 3; photographers, 2; pianos (and miscellaneous musical instruments), 1; radio supplies, 5; restaurants (including hotels), 5; shoes, 2; sporting goods, 2; women's apparel, 2.

Special Information: The Starr Piano Co. has retail stores in 80 leading American cities. Richmond makes more caskets and more lawn mowers than any other city in the country. Richmond industries are very diversified and Richmond has never been very seriously affected by shut-downs and strikes. We have never had a complete shut-down or strike that was serious.

Residential Features: The residential district is composed very largely of one-family homes. There are some duplex houses, built so as to share only the mid-wall in common. Workmen's tenements are almost unknown, as the city was settled largely by Quakers and German immigrants, both classes proverbially partial to strictly home life. The area of the city is in the neighborhood of 16 square miles. It is not a boast but a fact, that Richmond is one of the most beautiful cities in America. It has a very large percentage of home owners.

Retail Shopping Section: Main Street from 1st to 13th; South 5th Street, Main to A; on 6th, 7th, 8th and 9th Streets two business blocks from North A to South A Streets. There are several outlying retail business sections of a neighborhood character.

Trading Area: Three railroads, two interurban lines, and nine bus lines and hard surface roads with nearly 30,000 automobiles make Richmond a trading center for this entire territory.

Wholesale Houses: Groceries, 3; meats, 2; fruits, 6; hardware, 2; dry goods, 1; miscellaneous lines, 7—Bakery, drug, soft drinks, poultry, farming, implements, electric, leather goods.

Theatres: Legitimate, 5; Moving Pictures, 6; Vaudeville, 2; Miscellaneous (Auditoriums, etc.), Municipal Forum. Total number of seats, 26,-000.

Location: Wichita is located in Sedgwick County, Kans., and its territory embraces one of the richest parts of Kansas and Oklahoma. Its transportation facilities comprise a network of railroads reaching every point in the southwest, viz.: the Santa Fe, Rock Island, Frisco, Missouri Pacific, Midland Valley and Orient. Wichita is also served by the A. V. L. Interurban Ry. and the Laird Aeroplane Line.

Principal Industries: Flour milling, meat packing, oil refining, specialty manufacturing, gasoline lamps, steel tanks, work clothing, agriculture implements, brick, tile, incubators, windmills, gas mantles, automobile tires, tanneries, strawboard, printing, furniture, and railroad shops.

Manufacturing Establishments, 350. Leading firms: The Coleman Lamp Co., Clear Vision Pump Co., Derby Oil Co., Cudahy Packing Co., Dold Packing Co., Red Star Milling Co., Laird Aeroplane Co., Ralston Broom Factory, Western Iron & Foundry Co., Zona Toilet Co., Bridgeport Machine Co., Johnson-Larimer Dry Goods Co. Total value of yearly output of factories estimated at $200,000,000.

Special Information: Wichita is a leading broom-corn market and a flour milling center. It has clean streets and little smoke because fuel oil and gas are used. Few business failures have been reported in the past 5 years. Population is almost 100% American and 97% white. Handles cash grain business annually of more than $150,000,000. Near center of Kansas and northern Oklahoma oil fields, and live stock shipping point. Wholesale center for big area in southern Kansas and northern Oklahoma. Excellent transportation and hotel services make Wichita ideal convention city.

Residential Features: Mostly one and two-family houses. Federal census of 1920 shows that 54% of the people of Wichita own and occupy their own homes. Residential sections are protected against "light" and "heavy" industries by zoning ordinance. While majority of residences are of "bungalow" type, street after street is lined with more costly and ornate homes. The more expensive homes are located in College Hill and Riverside sections.

Retail Shopping Section: Extends from Main and Douglas (which forms heart of business section and terminal for trolley and bus lines) for 20 blocks on E. Douglas Ave., 11 blocks on W. Douglas Ave., 8 blocks on N. Main St., 3 blocks on S. Main St. William, First and Second are business streets running parallel to Douglas Ave. and extends for six blocks. Water, Market, Lawrence, Topeka, Emporia and St. Francis are business streets running parallel to Main St. and extends for 3 blocks both ways from Douglas Ave., also 5 outlying retail business sections and several smaller "neighborhood" sections.

Seven Reasons

Why The LEXINGTON LEADER is the key to the Lexington, Kentucky, market (*Blue Grass Region*).

More circulation—better quality of circulation—better balanced distribution—more reader confidence—evening newspaper advantages—costs less per thousand circulation—more intelligent cooperation to advertisers.

Any Lexington Leader representative has at his command facts and figures to prove the correctness of each one of the above mentioned advantages of The Lexington (Kentucky) Leader.

Because it has paid them, advertisers bought in the first ten months of 1925 almost twice as much national advertising space in The Lexington Leader as was consumed in any other Central Kentucky newspaper.

Read what happened in Louisville October 31st!

ON the last day of October The Louisville Herald and The Louisville Post took the most progressive forward step in Louisville newspaper history. The two papers were consolidated under the title of The Herald-Post and the morning edition was changed under the ever more popular tabloid size. The combined papers contain all the best features which characterized them as separate units. In every respect, the Herald-Post is worthy of its magnificent new plant—the finest in the whole South.

Tabloid in the Morning

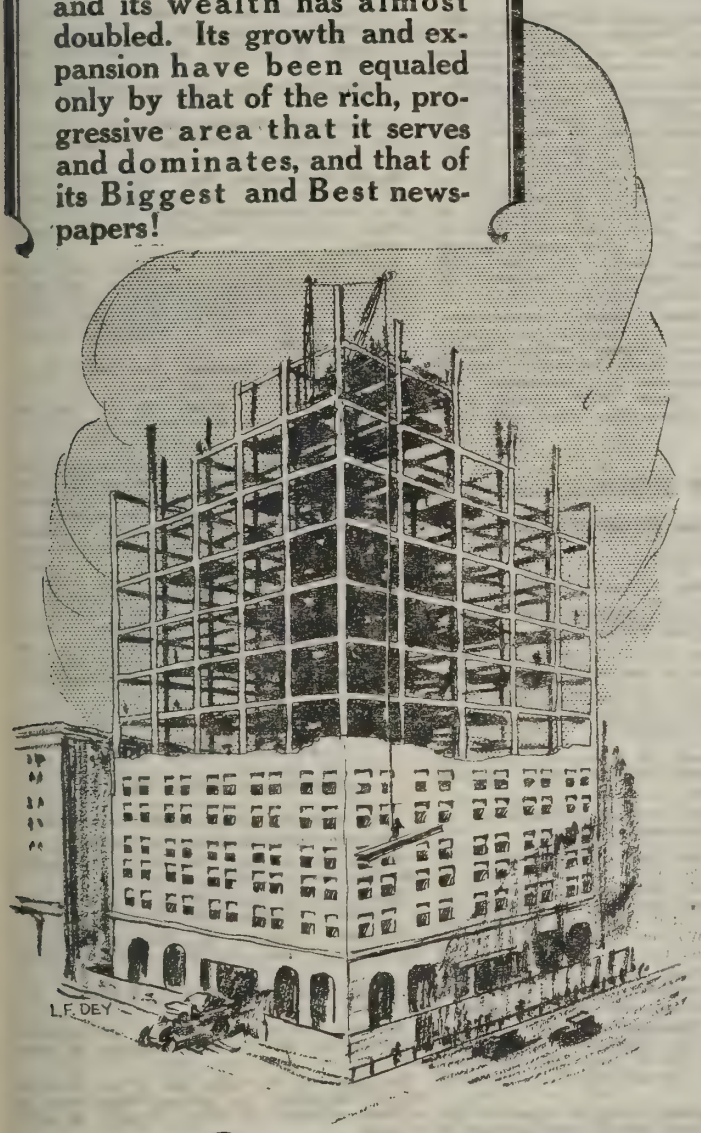
enabling the reader to absorb the news quickly if he wishes. A complete, compact paper for the man or woman whose mind keeps pace with the times.

Standard Size Evenings

No hurry about reading the evening paper, and the Herald-Post is not a paper that invites haste. Every member of the family welcomes it.

Standard Size Sundays

A big, modern Sunday paper with all the accepted features. A multi-sectioned armful of news and entertainment for the whole day—and the whole family.



In making up your Louisville schedule—include the Herald-Post and *cover the whole market.*

New Orleans
America's Most Interesting City

—is situated at the entrance of the great funnel-shaped valley of the Mississippi—producing 80 per cent of the crops of the continent; between 70 and 90 per cent of its chief minerals and from 50 to 80 per cent of its manufactured products.

—is the nation's second greatest port.

—is consistently the leader of Southern cities in volume and growth of bank debits to individual account—perhaps the best barometer of a city's prosperity.

—is the financial center of the South, with bank resources aggregating well in excess of $300,000,000.

—is the industrial center of the South, with a manufactured output equal to that of any other Southern city—a total of 1200 industrial plants turning out 850 different products.

—is the sixteenth city of America.

—is the first market of the prosperous South—for YOUR product.

New Orleans' One Big Newspaper

The dominance of The Times-Picayune in all three major divisions and practically all standard classifications of advertising is so great that the people of New Orleans and trading zone regard it as the authoritative bearer of tidings from those who have merchandise or service to sell.

LOCATION AND TRANSPORTATION

Situated at the head of Massachusetts Bay, 230 miles northeast of New York, it has a harbor with berthing space of more than 40 miles, most of which is in active use for commercial purposes.

It is the terminus of three large railroads, the Boston and Maine and subsidiary lines, the Boston and Albany (New York Central, lessee) and the New York, New Haven and Hartford and subsidiary lines. It is also the terminus of the Boston, Revere Beach & Lynn R. R.

The Boston and Maine connects Boston with points west, north and east. Besides serving directly the territory in Maine, New Hampshire, Vermont, part of New York and the northern half of Massachusetts, the Boston and Maine connects at Portland, Maine, and other junctions in that section with the Maine Central Railroad for Maine and eastern Canadian territory. At Newport, Vermont, and White River Junction, Vt., traffic is fed to the Canadian Pacific and the Grand Trunk, respectively, thence to points in Canada and the west. Grand Trunk business moves via Central Vermont as intermediate carrier. Bellows Falls, Vermont, is a point of connection with the Rutland R.R. and an important route to western Vermont, the Adirondack region and the west. The chief outlets of the Boston and Maine for western traffic are, however, Mechanicville, New York, a junction with the Delaware and Hudson, and Rotterdam Junction, New York, with the New York Central and West Shore lines. At Troy, New York, there is also connection with the New York Central and the Hudson River Boat lines.

The Boston and Albany, in a general way, parallels the Boston and Maine in a westerly direction from Boston. It forms a part of the New York Central system and joins the parent line at Albany for all points west.

The New York, New Haven & Hartford railway network covers southeastern Massachusetts, the states of Rhode Island and Connecticut, connecting at New York City with the various trunk lines west and south.

The various terminals at Boston are connected by the Union Freight R.R. operating along the waterfront for the interchange of freight. The Boston and Albany and the Boston and Maine also have direct rail connections for this purpose.

In addition to the freight service given by these roads, they daily bring to the terminal stations a vast throng of commuters. The northeastern section of the Metropolitan District is served by the Boston, Revere Beach and Lynn Railroad. This urban steam line each day in the year brings in its thousands of commuters.

Number of passengers on steam railroads to and from Boston, yearly, Boston & Maine, 30,604,045; New York, New Haven & Hartford, 30,553,292; Boston, Revere Beach & Lynn, 12,549,546; Boston & Albany, 9,772,264; total railroad passengers, 83,479,147.

Passenger trains in and out of South Station, during summer season, 586 a day, 402 of which are N. Y., N. H. & H., and 184, B. & A.; North Station, 395 a day; Boston, Revere Beach & Lynn, 426 a day.

There are four electric railway systems in the Metropolitan area. Of these, the Boston Elevated Railway System is by far the largest. It comprises surface, elevated and subway lines, which serve a population of 1,220,000. The 533 miles of track traversing this area comprise 45 miles for rapid transit cars, including elevated and subway lines, 45 miles of surface track in reservations and 16 miles of track in subways, tunnels and viaduct for surface cars. This physical arrangement of tracks and the speed maintained enables the inhabitants of the farthest outlying towns to reach the business portion of the city within 40 minutes. Last year there were 382,149,667 passengers carried.

Subways and tunnels connect Cambridge, East Boston, Dorchester and Back Bay area with the heart of the city. Elevated lines run from Forest Hills to Everett and to East Cambridge. In addition, there is the Atlantic Avenue Elevated line connecting the North and South stations and serving many of the steamship wharves.

Of more than 2,000 revenue passenger cars, 95 steel Cambridge subway cars (about the size of Pullman cars), 338 steel and semi-steel elevated cars and 616 semi-steel centre entrance motor and trailer cars represent the latest advance in car design.

The feature of the transportation system is the possibility of transferring from surface cars to rapid transit lines and from rapid transit lines to surface cars at all transfer stations; and the general adoption of bodily transfer points on the system so as to do away with the necessity of procuring a transfer ticket.

Districts not covered by the Boston Elevated System are served by the Eastern Massachusetts Street Railway System, the Boston and Worcester and the Middlesex and Boston Street Railways. Taking Metropolitan Boston as a whole there is no section which is not efficiently served by one or more of the transportation systems which connect it with the business centre.

Bus lines are now running from Boston to New York also many large cities in New England. Regular schedules are maintained.

instruments and the materials used in their production amounted to more than $13,000,000. Several makers of national reputation are located in Metropolitan Boston.

Slaughtering and Meat Packing

Although Metropolitan Boston is not one of the great meat packing centers of the country the annual product of the slaughtering and meat-packing industry amounts to nearly $100,000,000. Hence the densely populated regions in this locality are by no means wholly dependent upon the distant western sources of supply for their meat products. The great establishments in Somerville and Cambridge, employing several thousand workers, have a successful history of more than seventy years. In addition, Boston is the most important New England distribution point for western shipments. Several collateral industries of considerable importance have been built up in the Metropolitan Area.

Soap and Medical Supplies.

Situated in the Metropolitan District is a factory of one of the world-famous soapmakers. This and the other 16 soap establishments of the region produce an annual output valued at approximately $17,500,000. The manufacture of patent medicines and drugs amounts to more than $16,000,000; and the plant of a company with branches all over the country is located here.

Electrical Machinery

With one of the largest electrical manufacturing plants in the world, and numerous other establishments, Metropolitan Boston is easily a leader in the production of electrical apparatus. In the ten years between 1909 and 1919 the number of workers employed by this industry in Massachusetts increased more than a third and the value of goods produced more than tripled. The total 15,678 electrical workers in Metropolitan Boston alone exceeded the number employed in the whole state ten years before. The value of electrical manufactures in Metropolitan Boston amounted to $55,901,540 at the last federal census, more than half the total for the whole state in the same year and almost twice the total of ten years before.

Confectionery

High quality confectionery is among the outstanding products of Metropolitan Boston. Within the municipal limits of the city are more than sixty candy factories, a stone's throw across the river in Cambridge are about twenty-five more and within the whole Metropolitan District almost a hundred establishments are catering to the demands of the American sweet tooth. With the ice cream establishments included, this number is increased by a third. It is, in fact, Boston's fifth greatest industry. More than $55,000,000 worth of confectionery and nearly $44,000,000 worth of ice cream are placed on the market every year from the establishments, which furnish employment to more than 10,000 wage-earners, a large proportion of whom are women. Many of these candy factories with their modern and sanitary equipment and their attractive rest rooms for employees are among the show places of Boston.

Furniture Specialties

Furniture manufacturers in Metropolitan Boston include office furniture, folding and portable chairs, reed and rattan furniture, carriages and go-carts, school furniture, toy vehicles, railway car seats, cocoa mats and matting and other reed and rattan products.

Boston is the home of one of the greatest reed and rattan furniture manufacturing companies in the country. Its nine plants turn out a large part of the total American production of these specialties.

The Metal Trades

In the Metropolitan District 277 foundries and machine shops turn out an annual product amounting to more than $55,500,000. Tools and cutlery from 25 factories add $18,000,000 more to the annual output of metal products.

The Shoe Industry

Within 25 miles of Boston are more shoe factories than in any other section of similar size in the country. Boston is the greatest market in the world for boots and shoes. Practically half of all the rubber boots that are made, are manufactured in Eastern Massachusetts.

Boston is the headquarters of the industry which manufacturers practically all the shoe machinery used in this country.

Cotton and Woolen Textiles

Boston is the leading market in the U. S. A. for cotton and woolen textiles.

Boston is the centre of the most important cotton manufacturing district in the United States. Located here are the executive offices of many of the great cotton mills of New England, the national organization of cotton manufacturers and, of course, a large number of cotton brokerage houses and warehouses. It is, moreover, the greatest American port of entry for Egyptian cotton.

Boston receives more than half the raw wool imported by the United States each year. If the receipts of foreign and domestic wool are both taken into consideration the average annual receipts at Boston for a ten-year period exceed 412,000,000 pounds—more than the total wool clip of the United States and about one-seventh the total wool production of the world. Enough wool passes through this city each year to make an all-wool suit for every man, woman and child in the United States. Boston is capable of storing in one wool warehouse more than 100,000,000 pounds of wool.

The Fish Trade

Boston is the most up-to-date fish port in the world and in production is exceeded only by Grimsby, England. It has one of the largest fish piers in the world, built at a cost of $3,000,000, 1,200 feet in length, 300 feet in breadth, 537,000 square feet in area, having capacity for the simultaneous discharge of 80 vessels. On and adjacent to it is the largest fish freezing and cold storage plant in the country, with a capacity of 15,000,000 pounds, ice-making capacity of 230 tons daily and ice storage for 10,000 tons.

Boston distributes more than 150,000,000 pounds of fish annually—the new Boston Fish Pier alone has handled over 2,000,000 pounds a day. This great business of turning into wealth the resources of the sea is an almost unappreciated asset.

Clothing

Boston is one of the six great clothing markets of the United States. The latest federal census reports 9,995 wage-earners employed in all branches of this industry in Metropolitan Boston. The output of men's clothing amounts annually to over $33,000,000 and of women's clothing to about $25,000,000.

SPECIAL INFORMATION

Metropolitan Boston is an area of approximately 409 square miles designated by statutory enactment, including Municipal Boston (748,060 population) and thirty-nine surrounding towns and cities, with a total population of 1,658,936.

Boston is a commercial and industrial centre of 1,657,000 people (Federal Metropolitan Boston 1,172,000) rather than a city of only 748,000. The real Boston extends far beyond the municipal boundaries. There is no break in the widening circle of stores, warehouses and factories which are thickly spread over the whole area of Metropolitan Boston. The forty towns and cities, whose economic interests are inextricably bound up with the banking and railroad and port facilities of their centre, comprise the real Boston. This Metropolitan District forms a powerful economic unit, the natural centre for the manufacturing and trading interests of New England, one of the richest industrial regions of the country.

There are 243,342 gas meters and 237,522 electric light meters in Boston.

Automobile registration in Boston only, pleasure cars 66,795, trucks 15,361.

In the metropolitan district there are 392,860 telephones.

New England	5,781,679,000	7,188,636,000

Variety—Of about 350 recognized industries, more than 250 are represented in Metropolitan Boston.

Assessed Valuation: $2,737,589,002—an average of $9,560 per property taxpayer.

Foreign Trade: Only surpassed by four cities in the United States.

Annual Imports	$392,752,807
Annual Exports	192,802,178
Total	$585,554,985

Not only is Metropolitan Boston a mighty centre, but it is steadily growing in size and importance. So far from being merely bedrooms of Boston business people, the other municipalities of the Metropolitan Area are so many parts of one great business community.

Thirteen of these municipalities each manufacture annually goods valued at over $10,000,000, and nine more than $20,000,000 each. Below the $10,000,00 line, among the smaller communities which are chiefly residential in character, are twelve, each of which turns out over a million dollars worth of goods annually, the amount ranging from a little over $1,000,000 to more than $9,500,000. In the three cities of Metropolitan Boston which are next to Municipal Boston in industrial importance more than $255,000,000 are invested in manufacturing plants and machinery, and the aggregate output of these establishments amounts to more than $388,000,000 a year.

RESIDENTIAL FEATURES

The residents of Municipal Boston occupy almost exclusively fine apartments in the better sections and "tenements" and small apartments in the poorer districts.

The largest number of "tenements" (some of the familar "3-deck" classification) are in North End, West End, South End, part of Charlestown, Roxbury, Dorchester, South Boston and East Boston.

The better class of apartments are in Dorchester, West Roxbury, Hyde Park, Jamaica Plain, Brighton and Back Bay Section.

Other sections having individual homes and in some cases large estates are Milton, Dedham, Wellesley, Lincoln, Lexington, Winchester and Weston.

Total owned homes in Boston 30,132 or 19,609 mortgaged, 9,998 free, 525 unknown, total rented 132,658; tenure unknown 1,995. The total number of buildings in Boston are 113,782—34,957 are constructed of brick, concrete, etc., and 78,825 are constructed of wood.

RETAIL SECTION

In Metropolitan Boston there are many retail sections. Each of the 49 towns and cities has its own shopping center, or centers. Of course, the largest and therefore most attractive shopping districts are in the heart of Boston or close to its borders.

The principal shopping center is in a district about 1½ miles long and ¾ mile wide. In this section are the shops, theatres, banks, etc., of far-famed Washington St., Tremont St., Boylston St., Summer St., Winter St., West St., Temple Place, Bromfield St., and Park Square section.

There is a busy retail and wholesale marketing district on Dock Square, Blackstone St., North Market St., South Market St., Clinton St. (including "Faneuil Hall" and Quincy markets).

In the "West End" there is a retail district at Scollay Square, Bowdoin Square, Tremont Row and Hanover St., totalling about a mile. In the "North End" there is another retail district of five or six blocks on Hanover St., Haymarket Square and radiating streets. South Boston has a shopping district about one mile on West Broadway, Dorchester St., and Andrew Square.

In Dorchester there are a group of stores at Uphams Corner, Fields Corner, Grove Hall, Meeting House Hill, Dorchester Center, Neponset, Ashmont and Mattapan. In Roxbury district there is a retail section on Washington St., Blue Hill Ave., and Dudley St. At Roxbury Crossing the retail section is at Columbus Ave. and Tremont St.

In Charlestown there is a busy section on Bunker Hill St., Main St., and City Square, about one mile long.

The principal shopping center of Allston-Brighton District is on Brighton Ave., Harvard Ave., and Commonwealth Ave. Brookline (the richest section in Metropolitan Boston) has a retail section at Brookline Village and at Coolidge Corner. The Jamaica Plain section is ½ mile on Center St. The East Boston principal retail section is on Central Square, Meridan St. and at Orient Heights.

PORT OF BOSTON

Boston with one of the finest natural harbors on the Atlantic Coast, equipped with modern piers, docks and warehouses, stands well to the fore, among the ports of the world. As a shipping point to European ports Boston has an advantage over other American seaports. It lies 200 miles nearer Europe than New York. As compared with any other Atlantic seaport from 150 miles to 500 miles are saved in the voyage from Boston to Copenhagen, Hamburg, Amsterdam, Antwerp, Cherbourg, Havre, Liverpool, London, Gibraltar, Naples or Constantinople.

A harbor area of 30,000 acres and 141 miles of linear waterfront, make Boston capable of handling a growth of commerce to at least three times the present amount. There is practically no limit to the size of vessels which can be accommodated. Of the total 40 miles of berthing space, eight miles have a depth of 30 feet or more, mean low water.

The construction of Commonwealth Pier by the State, at a cost of $4,500,000 just before the war gave to Boston splendid docking facilities for passenger and freight steamers of heavy draught. The pier is twelve hundred feet long, and 400 feet wide, it provides berthing space for five 600-foot ocean-going vessels at once. Three large two-story warehouses of steel and concrete contain 900,000 square feet of floor space. The pier is connected with the railroads by six tracks, two of which run alongside the ships at their berths.

More than a mile of berthing space, capable of accommodating nine or ten large ocean-going steamers, is available at the United States Army Supply Base in South Boston. Built during the war, this Army Base, the second in size in the country, is now likely to be turned over to commercial uses. The main storehouse is an eight-story building, 1,638 feet long and 126 feet wide, with a total floor area of nearly 40 acres. Three supplementary buildings—one 1,638 by 100 feet, of two stories, and two 294 by 100 feet, each, three stories high, provide an additional floor area of about 900,000 square feet. The modern equipment of this pier makes possible exceptional rapidity in handling of shipments.

Other extensive pier and dock facilities are provided by the railroad terminals in East Boston. The Boston and Maine Railroad property includes the Hoosac Tunnel Terminal, with five large piers, freight sheds and a grain elevator, and the Mystic Wharves, comprising seven wharves with freight sheds, coal pockets and a grain elevator. The Grand Junction Wharves, owned by the Boston and Albany Railroad, comprise six piers with warehouses and a large grain elevator. A pier recently constructed by the State is also situated in East Boston. The New York, New Haven and Hartford Railroad has ample wharf facilities in South Boston. Of the numerous piers owned by coastwise shipping companies, coal companies and private pier and warehouse companies, the majority have direct connections with the railroads entering the city.

The opening of the dry-dock at South Boston puts the Port of Boston among the leaders in repair facilities. The government plans to construct two wet docks nearby and to install a thoroughly modern repair plant. Within Metropolitan Boston at Quincy is one of the most important ship yards of the country.

Boston is served by freight and passenger lines to the principal seaports of Europe and by regular freight lines to and from the Far East, South America and Australia. It is also the terminus of an extensive coastwise trade which helps to feed the foreign shipments. Boston's foreign trade is surpassed only by New York, New Orleans, Philadelphia and Galveston. In imports alone, it surpasses all American ports except New York.

TRADING AREA

For the purpose of securing accurate information for the Trading Area of Boston, the representatives of EDITOR & PUBLISHER consulted the advertising managers of three large retail establishments, several departments which keep an accurate check upon sales and deliveries of merchandise, both by person and mail, and several other reliable sources.

The trading areas are divided into four classifications: First, the territory from which the retail establishments of Metropolitan Boston de-

Where Statistics Stop---

Statistics tell you something about the value of a particular newspaper as an advertising medium; the representatives tell you something—but for conclusive evidence, let the paper speak for itself.

For example, if you want to know which Boston paper reaches the best buying element, lay all Boston papers for a given day on your desk. Compare the editorial content—the space devoted to world news, to business and financial interests, to art, drama, and club life. Consider typography, makeup, newsprint.

One—and only one—by sheer intrinsic merit establishes itself as the paper which must of necessity appeal to the dominant group! And that paper is the Boston Evening Transcript.

The Transcript will gladly mail a sample copy to agencies wishing to make this test for themselves.

BOSTON—THE MARKET

Accessibility

Metropolitan Boston (designated "City" by the A. B. C.), with 1,658,936 residents, has a larger population than the states of Maine, New Hampshire and Vermont *combined*. There are 3,849 people per square mile in Metropolitan Boston and 41 per square mile in that area including Maine, New Hampshire, and Vermont.

Buying Power

In the Boston Trading Area (30-mile radius) there is a population of 2,531,167, 93% of whom have savings accounts totaling more than one billion dollars. This means that there are 500,000 families within 30 miles of Boston with an average savings account of $2,000.

THE BOSTON GLOBE

The Advertising Medium for the Market

In this rich and densely populated area, 80% of the Globe's circulation is concentrated. A comparative study of the distributions of the Boston Sunday newspapers (when delivery is made to the *home*) reveals that the Globe predominates in most of the choice localities.

Great Family Newspaper

In 1894 the Globe began its famous Household Department, thus extending its home appeal in the introduction of which the Globe was a pioneer. The Globe has been for years the outstanding family newspaper in New England and is characterized by its clean, accurate, and complete news, and by its reliable advertising columns.

Advertising Leadership

For 31 consecutive years the Globe has carried a larger total volume of advertising than any other Boston paper. From the department stores, probably the most critical of advertisers, the Globe carries at the rate of a million lines more yearly than its nearest competitor. In automobile and accessory advertising, real estate, and other important classifications the Globe dominates the field.

rive their daily support; second, the area from which the stores secure what is termed "Once a Week" business (thousands of people living in this area are accustomed to make weekly trips to Boston for business and pleasure); third, the "Once a Month" area, a wider and not so thickly populated territory, but one where large sales are made because the patrons of the Boston stores who live in this territory are usually large buyers on these monthly or twice a month visits to the metropolitan center; fourth, the "Seasonable and Mail Order Territory," the area from which business is secured by mail or because of once a season (in some cases once a year) visits to Boston on the part of people living in extreme northern and western parts of New England. These latter customers of Boston establishments buy in large quantities, often a whole season's supply of clothing and other necessities, in one order.

The First or "Daily Area" extends on the north from Rockport, Mass., on the coast, directly west to Nashua, N. H. From this point it swings in a half circle south through Fitchburg, Mass.; Worcester, Mass.; smaller towns of northeastern Rhode Island, southeast to Fall River and east to the coast at a point just south of Plymouth. These boundaries are based upon the transportation facilities which enable buyers to visit Boston by steam train and trolley in an hour or less, thus making it possible for shoppers to come to Boston in the morning and return in the afternoon, or, in some cases, before lunch hour. From this area the largest Boston stores derive their daily support and to each corner of the territory is maintained exceptionally fine delivery service.

The Second or "Once a Week" area extends north to a point on the coast near Kennebunk, Me. The northern limits of this area circle west and south to Concord, N. H., thence to Winchendon, Mass., and south across the Connecticut boundary to Thompson, Conn. From this point the area extends southeast to Providence, R. I. and then east to almost the same point as the end of the "Daily Area."

The Third or "Once a Month" area because of fine railway accommodations, extends north in Main to a point on Penobscot Bay just north of Northport. The fact that there is a daily steamboat line from Boston to Bangor during Summer and in Winter as long ls navigation is open, has a stimulating effect upon business from this section. From this point the "Once a Month" area extends southwest through Auburn and Lewiston to a point just beyond Lebanon. From there the boundary extends west just north of Concord, N. H., to Claremont, N. H. From there the western limits of the territory follow close along the Connecticut River to Springfield, Mass. From this point the area extends southeast through Stafford Springs, Conn.; Ashford, Conn.; Sterling, Conn.; across Rhode Island to Newport and east along the coast to Cape Cod.

The Fourth or "Seasonable and Mail Order" area includes all of Maine, New Hampsbire, Vermont, Massachusetts, Rhode Island and about one-half of Connecticut. The southwestern boundaries run diagonally across Connecticut from New London to Norfolk and No. Canaan, passing through Hartford.

These areas have been rechecked by the Boston Chamber of Commerce, sales promotion departments, advertising managers and others thoroughly familiar with New England business conditions, retail merchandising in metropolitan Boston, transportation facilities and general conditions, which have a tendency to make Boston the natural wholesale and retail trade magnet of New England.

1626 SALEM 1925

299 Years Young—Center of

150,000 POPULATION

including Salem and 20 or more nearby communities, among the larger of which are Peabody, Beverly, Danvers, Ipswich, Marblehead, Manchester, Essex.

Salem is one of the oldest settlements on the North American Continent. It became a buying and trading center for a large section of the so-called North Shore of Massachusetts nearly 300 years ago.

At the present time, aside from the industrial importance of the city, its retail establishments are far and above those found in most cities of even much larger population. The retail establishments are operated by live, up-to-date merchants, who are now continuing to keep Salem in the foreground as a buying center.

The Salem Market:
The City of Salem and about 20 nearby towns.

Population	150,000
Industrial Plants, about	178
Invested Capital, estimated	$21,000,000
Workers, estimated	50,000
Annual Payroll, estimated	$35,000,000
Value of Products, estimated	$85,000,000
Bank Resources, estimated	$94,000,000

Principal Industries:

Leather Novelties	lumber	boats
sheets	games	sheep skin
shoes	boxes	glue
incandescent lamps	embossing machines	gelatin
tanning	underwear	tallow
bleaching	chamois	leather machinery
belts	tents	granite and stone
freight and passenger elevators	awnings	hair goods
	foundries	blacking

and numerous other products made from leather, cloth and paper.

THE EVENING NEWS

is the only daily paper published in Salem, founded by Robin Damon in 1880.

Circulation now over 21,000 net paid. This circulation has been built by the creation of good will, and by its absolute devotion to its own people, by giving them the local news, and that of the neighboring towns as well as news of national and international importance received over its own private wires—the best news services in the country.

The News does not make use of premiums, schemes, etc., but its excellence and enterprise in local news gathering enables it to hold its circulation against all sorts of efforts made by outside papers.

The carrier delivery system in the city of Salem alone consists of more than 100 carriers who deliver the News every night directly into the homes. Street sales are comparatively small.

In addition, there are many other carrier deliveries in 20 or more nearby towns for which the News is also the home paper, with our own correspondents in each of these places, and they buy the News for the local happenings not only in their own town, but in other places in our field.

Our territory is so situated that the distance is short from one place to another, and the readers are interested in the news of their neighboring towns.

Advertisers may reach this excellent market through the columns of the Evening News, the quickest, surest and best way at reasonable cost.

TAUNTON, MASS.

Where Diversified Industries Flourish!

With over 9,000 wage earners and a $40,000,000 total product, Taunton has fourteen of its firms each turning out over $1,000,000 in goods annually.

Some of Taunton's greatly varied industries are:—
Seven stove foundries.
Large brick and tile works.
Brass Foundries.
A General Electric Plant.
Shoe Button and Eyelet Factories.
Taunton-New Bedford Copper Co.
Four large silver and Britannia ware factories.
Twelve Textile Mills.
Jewelry, Machinery, Buckram Products, Leather Goods, Two Oil Cloth Plants, etc.

It's a city of skilled labor and a city of home owners.

The Taunton Gazette (Est. 1848) serves this territory and steadily improves its service to its readers. Old readers cleave to it and new ones are added even after it seems as if nearly every English reading family in the field was taking it.

Circulation 8946 and still growing!

LOCATION AND TRANSPORTATION

Detroit is located on the west bank of the Detroit River with a water front of approximately 24 miles, all of which will be available for deep water use whenever the Great Lakes-to-the-sea project is made available. It is 18 miles from Lake Erie and 7 miles from Lake St. Clair.

Detroit is served by the Pere Marquette, Wabash, Pennsylvania, Michigan Central, Detroit, Toledo & Ironton, Baltimore & Ohio and Canadian Pacific railroads, as well as by numerous interurban lines totaling 600 miles of tracks extending from 50 to 150 miles in all directions. There are also many bus lines. Inter city traffic of these railroads is handled by a belt line known as the Detroit Terminal R.R., serving the needs of various sections of the city for freight.

Numerous steamer lines carrying passenger and freight traffic operate in and out of Detroit, the principal line being the Detroit & Cleveland Navigation Co., operating vessels regularly between Detroit and Cleveland, Detroit and Buffalo and Detroit and Mackinac City. To nearest larger city (Chicago), by railroad, 5 hours; by trolley, 18 hours; by auto, 9 hours.

PRINCIPAL INDUSTRIES

Forty-eight per cent of the city's industrial life is devoted to the manufacture of motor cars and automotive products. The 1924 value of all manufactured products was $1,803,728,219, and the number of industrial workers was 363,496.

Foundry and Machine Shop products rank next in order of their valuation with a total of $59,997,181. Slaughtering and meat packing represented $57,648,125, while brass, bronze and copper products were valued at $49,239,768.

Other products manufactured in Detroit with a valuation above $10,000,000 per year are as shown below:

Engines, steam and gas	$36,611,142
Cash Registers and Adding Machines	35,429,028
Bread and bakery products	22,631,347
Stoves and furnaces	14,413,581
Structural iron work	14,051,030
Printing and publishing	14,017,463
Cigars and cigarettes	11,606,301
Book and job printing	11,430,857
Chemicals and drugs	11,355,383

It will be observed therefore, that Detroit is a city of diversified industry, contrary to general opinion. There are other industries of major importance, including hardware, stone work, galvanized iron work, metal cloth, aluminum, beverages, coffee and spices, undertakers' supplies, mattresses and bedsprings, optical goods, seeds, ice cream, lumber and mill products, men's clothing, concrete products, salt and alkali products, enameled ware, etc.

Manufacturing Establishments: 3,300. Leading firms: Ford, Dodge, Cadillac, Hudson, Packard, Chrysler, Hupmobile, Paige, Columbia, Essex, Studebaker, Maxwell, Gray, Rickenbacker, Jewett, Federal, and Gotfredson, (automobiles); Continental Motor, Kelsey Wheel, Fisher Body, Timken Axles, U. S. Tires, Frederick Stearns Co., General Motors, Briggs Muf. Co., Garland Stoves, Park-Davis Drugs, and Burroughs' Adding Machines are all famous Detroit products.

SPECIAL INFORMATION

Detroit is the largest city in Michigan, and the Fourth City in population in America. It is a city of growth and prosperity. Its population has approximately quadrupled since 1900. Department of Labor figures show Detroit industries to pay higher wages than are paid in any other city. Detroit has over 13 miles of improved harbor frontage, lying along both the Detroit River, and the River Rouge. Detroit stood first in 1920 among all lake ports in exports and imports, and is the home of 5 steamship lines, owning 37 vessels. About 2,000 motor trucks operate as an auxiliary freight service throughout the trading radius.

Detroit is noted chiefly for the position of preeminence it has attained in the manufacture of motor cars and automotive products. 83% of all motor cars built in America are made in and shipped from Detroit and the area immediately surrounding it.

Detroit however, leads the world in production in some twenty other manufactured products, including adding machines, soda ash products, wire cloth, pharmaceutical products, stoves, seeds, brass rolled products, cigars, coin machines, malleable iron, etc.

Through the Detroit River there passes each year five times more shipping tonnage than passes through the Panama Canal. An average of one vessel every sixteen minutes each 24 hours of the 250 days of navigation passes Detroit.

RESIDENTIAL FEATURES

One- and two-family residences predominating. There are approximately 8,450 apartment houses and apartment hotels, but relatively few tenements. The industrial nature of the population makes the rooming house an important feature in Detroit's housing. In spite of this the great majority of citizens live in single or double dwellings.

The better class residential sections are located in the northwest section of Detroit bounded generally by Woodward Avenue and Grand River. The wealthier residential sections are located at the extreme east side of Detroit on Lake St. Clair. Wealthy residential sections are also developing to the north of Detroit out Woodward Avenue in what is known as the Bloomfield Hills district. The "slum" districts are located on the East side of Woodward Avenue composed of approximately three square miles very densely populated. In the square mile bounded by Hastings, Brady, Rivard and Livingston Streets, there are 113,488 persons living consisting of Negroes, Jews (Russian) and Italians. The square mile enclosed by Hastings, Adelaide, Rivard and Division streets contains 103,552 persons. In the square mile bounded by Hastings, Wilkins, Rivard and Watson, 95,560 persons live. The population is mostly Negroes and Russian Jews.

Detroit is a Market of 42 Nationalities

Its Purchasing Power is Covered by One Newspaper

The New Free Press Bldg.

DETROIT'S population of 1,242,044 is made up of 42 nationalities ranging from 598,042 native born whites to 722 Orientals.

It is a mixture of the East and the West, of the North and the South. But it is a busy, mightily prosperous population, good natured, constructive, responsive to advertising.

Here the descendants of Ham work cheerily alongside the descendants of Shem—here the Chinaman with his queue fattens his bank account by washing the collars of long-haired whites—"Deep River" is crooned by Southern Negroes alongside Canadians who hum "The Maple Leaf."

Detroit is a market of vast complexities and possibilities, but the better part of it—the homes that make up the real purchasing power of America's Fourth City—is reached each morning at the breakfast table through The Detroit Free Press—a fact that has been true since 1831.

There is an ever-growing appreciation of The Free Press here—the last (October 1st) post office circulation statements show that the daily Free Press gain for the preceding six months was nearly twice that of any other Detroit paper—the Sunday Free Press gain nearly five times greater.

You can tell it, sell it, better, in the morning in Detroit, through The Free Press—more efficiently, more effectively, at lower cost.

Location: Minneapolis is situated on the Mississippi River, at the Falls of St. Anthony, the head of river navigation, with municipal docks and landing stages. It is 10 miles west by north of St. Paul, and is served by the following railroads: The Chicago, Burlington & Quincy Railroad Co.; Chicago, Great Western Railroad Co.; Chicago, Milwaukee & St. Paul Railway Co.; Chicago, Rock Island & Pacific Railway Co.; Chicago, St. Paul, Minneapolis & Omaha Railway Co.; Minnesota Western Railway; Great Northern Railway Co.; Minneapolis, Anoka & Cuyuna Range Railway Co.; Minneapolis, Northfield & Southern Railway Co.; The Minneapolis & St. Louis Railroad Co.; Minneapolis, St. Paul & Sault Ste. Marie Railway Co., and the Northern Pacific Railroad Co. To nearest larger city (Milwaukee, Wis., 428 miles), by railroad, 10 hours; by auto, 17 hours.

Principal Industries: Flour mills and grist mills, linseed oil, bread and bakery products, cars and general shop construction, food preparations, printing and publishing, artificial limbs, tents and awnings, mattresses and spring beds, furniture, confectionery and ice cream.

Manufacturing Establishments: Approximately, 1,700. Leading firms: Pillsbury Flour Mills, Washburn-Crosby Flour Mills, Russell-Miller Flour Mills, Munising Wheat Corporation, Minneapolis Steel Machinery Co., Flour City Ornamental Iron Works, Minneapolis Heat Regulator Co. Total value of yearly output of factories estimated at $1,079,900,000.

Special Information: Minneapolis is the largest city in Minnesota, and of the N. W., of which it is the manufacturing wholesaling, retailing, distributing, financial, and educational center, the State University being located here. Minneapolis has one of the most up-to-date scientific water supply systems in the country. Water is pumped from Mississippi River above city to filtration plant, where it is filtered and sterilized. Daily consumption is 42,771,000 gallons. The pumping plant has a daily capacity of 130,000,000 gallons. Valuation of Minneapolis municipal property is $85,000,000; 239.79 miles of street railway track operated. In 1924 number of car miles operated was 16,680,755. Number of revenue passengers hauled was 126,492,460. Minneapolis is a city without slums. Minneapolis is also noted for its Institute of Arts, the Walker Art Collection, its Symphony Orchestra, Conservatories of Music, etc.

Residential Features: Minneapolis is a city of homes. July 1, 1925, count by City Planning Commission shows over 60,159 single-family dwellings, approximately 5,924 duplexes, and 2,004 apartments. The labor population is primarily home-owning, which is an outstanding feature. One of the large labor districts is bounded as follows: South city limits, Chicago Avenue and 40th Street, Cedar Lake Street, and the Mississippi River, is almost exclusively single family residences. Important: The density of population within the limited bounds of the city is greater than in most of the larger cities of the country. The reason for this is that it grew out from the center, and the dwellings are not scattered.

Retail Shopping Section: Extends from First Avenue north to 5th Street, Hennepin Avenue; Washington to 10th Street, Nicollet Avenue. Second Street to 11th Street, Marquette, 4th to 11th Streets. All cross streets between Nicollet and Hennepin, from Washington Avenue to 11th Street, also Lake Street district. West Broadway district, Central Avenue district, Franklin Avenue district, Cedar, and Washington districts. Nicollet Avenue is said to be the largest retail street in the country without a car line, and has practically every line of merchandise carried by the stores in abutting streets.

Trading Area: The trade territory of Minneapolis is included in the State of Minnesota, North, and South Dakota, Montana, the northern border of Nebraska, the northern half of Iowa, western, and northern half of Wisconsin, and the Northern Peninsula of Michigan. There is 1,000,000 population within a radius of 50 miles, or within the first parcel post zone; 1,500,000 population within a radius of 150 miles, or within the second parcel post zone; 6,500,000 population within the trade territory of which Minneapolis is the industrial center.

Quite a number of small cottages are being occupied by tenants. There is a considerable number of very handsome houses in Hattiesburg constructed from the native yellow pine lumber. In the suburban sections the mill operators have built houses which are occupied by their workmen. There is also a number of negroes in these sections.

Retail Shopping Section: The retail section of Hattiesburg covers about twenty square blocks, divided practically in the center by Main Street, which runs north and south, and by Pine Street, running east and west. The business section is very conveniently situated for retail trade.

Trading Area: Hattiesburg's greatest asset is its trade territory, which extends from the city in all directions, from thirty to fifty miles. In this area are many small but prosperous towns, whose citizens come to Hattiesburg, "The Hub City," for a great deal of their trading. The city is easily accessible to this territory by gravelled highways and good railway facilities. The estimated population of Hattiesburg's trade territory is about 175,000 people.

--yes, Commerce, not political boundaries, determines the area of a *Market*

The 49th State is the St. Louis Market

—radius 150 miles surrounding St. Louis

Population . . . . towns . . . . industry . . . . transportation . . . . accessibility . . . . trade outlets . . . . all expressed in terms of *Commerce* . . . . determine the area of a market.

Commerce is the measure. It ignores political boundaries. City, county or state limits are not *trade* limits. . . . . As expressed above in the page reproduced from the News Bulletin of The J. Walter Thompson Company, advertising agents—

> *". . . trade does not go by counties, nor yet by states; even cities are not a satisfactory basis for comparing sales with population, since in almost every case a city of considerable size is surrounded by a large population which does in the city a substantial part of its buying, either wholesale or retail, or both."*

1,026,715 People in St. Louis But More Than 4,500,000 in The 49th State

1,026,715 people live in metropolitan St. Louis, yet within the natural trading area surrounding and including St. Louis there are more than 4,500,000.

Here, then, is the St. Louis market . . . . nothing less. It is more than St. Louis alone, large as it is . . . . more than a 30, 40 or 50 mile area . . . . a vast commonwealth extending out 150 miles in every direction . . . . known as *The 49th State*—the natural trading area of St. Louis.

. . . . A commonwealth with 372 towns of more than 1,000 population—vast and rapidly increasing industrial development—a veritable network of railroads and highways—every section quickly and economically reached.

On the other hand, by rail and by the bus load, more than 34,000 people a day pour into St. Louis.

The bulk of the 40,000 and more retail dealers in this market outside of St. Louis look to St. Louis as their natural source of supply.

Through them comes a 10-billion-dollar annual demand for shoes, drugs, hardware, dry goods, groceries, furniture, automobiles . . . . everything. Add to this the 8-billion-dollar buying power of metropolitan St. Louis and you have an 18-billion-dollar market.

And the great army of 49th State retailers look to The St. Louis Globe-Democrat—to Globe-Democrat advertising—to help them sell merchandise. 92.2% of them read The Globe-Democrat; 88.2% state that it helps them to sell goods.

The Largest Daily in America's Third Largest Market

The Daily Globe-Democrat covers this market, the third largest in the United States, as no other newspaper even claims to do. . . . . It enters more homes . . . . has more circulation . . . . 3 times as much daily circulation in The 49th State outside of St. Louis as the second St. Louis paper.

Ask the nearest Globe-Democrat representative to give you the facts about The 49th State, or write us direct. Executives interested in this market should avail themselves of the assistance The Globe-Democrat offers through its Service and Promotion Department and the Research Division.

ATLANTIC CITY, N. J.

(Atlantic County)

1920 Population, 50,707. 1925 estimate, 65,000.

Native Whites, 70%; **Negroes,** 15%; **Foreign Born,** 15%; **Industrial Workers,** 47%; **Families,** 15,148.

Schools: Public Grade, 14; High, 1; Parochial, 3; Number of Pupils, 10,550.

Churches: Baptist, 8; Christian Science, 2; Episcopal, 5; Hebrew, 5; Methodist, 11; Presbyterian, 6; Roman Catholic, 4; Miscellaneous, 4.

Banks: National, 5; State, 8; Total Resources, $66,955,698.19.

Theatres: Legitimate, 3; Moving Pictures, 11; three ocean piers, which give all sorts of amusements; numerous cabarets.

Location: Is located on an island about ten miles long, directly on the Atlantic Ocean. Has three railroads to Philadelphia, two of which also run trains directly to New York City. Trolley line runs the entire length of the city and two lines to the mainland. In addition to the railroad and trolley service there are three boulevards to the mainland, connecting with hard-surfaced roads to Philadelphia, New York, and all the main automobile routes. On the Pennsylvania and Philadelphia & Reading R. R's. To Philadelphia, by railroad, 1 hour; by auto, 2 hours.

Principal Industries: Practically the only business is the entertainment of visitors in the hundreds of hotels and boarding houses, and the rental of cottages throughout the Summer season. The number of visitors rangers from 15,000 during the dull months to 300,000 during the Summer months.

Special Information: Owing to the climate, transportation facilities, and unsurpassed hotel accommodations there are many conventions held in this city in addition to the regular class of visitors. Because of the climate, excellent schools, pure water supply, and train service there are many who make their homes in this city, whose business is in Philadelphia.

Residential Features: This is largely a city of individual homes as is shown by the fact that the 1920 census showed that there were over 9,000 dwellings. Owing to the almost universal custom of renting during the summer season, thus getting additional revenue, it is possible for people, to occupy a much finer home than could otherwise be done. There are also many apartment houses. The finest residential district is located in the southern part.

Retail Shopping Section: Most of the large and better class of stores are located on Atlantic avenue for a distance of 20 blocks; on Pacific and Arctic avenues for nearly the entire length, and on many of the cross-town avenues are located a considerable number of small stores, which are mostly of the neighborhood class. There are many large and fine stores on the boardwalk which cater especially to visitors.

Trading Area: Radius of about 20 miles and is made up of several towns of 1,000 to 5,000 population. All of easy access by railroad or trolley.

Wholesale Houses: Groceries, 3; meats, 5; fruits, 3.

Banks: National, 2; State, 10; Total Resources, $70,000,000; Savings Bank Deposits Total, $55,000,000.

Theatres: Legitimate, 1; Moving Pictures, 21; Vaudeville, 1; Burlesque, 1; Miscellaneous (Auditoriums, etc.), 3; Total number of seats, 19,000.

Location: Camden is on the east shore of the Delaware River, directly opposite Philadelphia. It is served by the Pennsylvania, West Jersey and Seashore, the Amboy, and New York Division, Long Branch Division and the Philadelphia and Reading Railroads, as well as five ferryboat lines. Camden has six and one-quarter miles of water front on the Delaware River, also about 5 miles on the Cooper River. The Delaware River front furnishes excellent sites for shipping lines.

Principal Industries: Talking machines, ships, soup, pens, cork products, leather products, furniture, soap, gas mantles, railroad shops, woolens, laces, hosiery, chemicals.

Manufacturing Establishments: 200. Leading firms, Victor Talking Machine Company, N. Y. Shipbuilding Corp., Campbell Soup Co., Esterbrook Pen Co., Hunt Pen Mfg. Co., Welsbach Company, Armstrong Cork Company, Warren Webster Co., J. B. Van Selver Co., MacAndrews and Forbes, R. M. Hollingshead Company. Total value of yearly output of factories estimated at $260,000,000. Annual payroll over $85,000,000.

Special Information: The Delaware River bridge, connecting Camden and Philadelphia, is now under construction and will be finished by 1926. The rapid growth of population in anticipation of the completion of the bridge, makes this the fastest growing territory in the east. The commercial engineers of the Bell Telephone Company have calculated the growth of Camden and its suburbs for the next 20 years. According to their statistics Greater Camden will have a population of 400,000 in 1930. Experts say the effect of this bridge will be similar to that of the Williamsburg bridge, rather than that of the Brooklyn bridge, because when the Brooklyn bridge was built there was no means of suburban transportation other than the street car.

Residential Features: Few cities afford better living facilities than Camden and its beautiful high-class suburbs. There are very few apartment houses in this area. In the city proper there are 25,000 private homes, which predominate in the suburbs.

Retail Shopping Section: The retail business section of Camden is conducted principally on five streets; namely, Market, Federal, Broadway, Kaighn Avenue and Haddon Avenue, as well as outlying neighborhood business streets. The principal business thoroughfares cover about 8 miles, and on them are found the financial institutions of the city, office buildings, printing establishments, department stores, etc. The thoroughfares lead to Camden's suburbs, from which Camden merchants draw a good proportion of their trade.

Trading Area: Extends about 20 miles north, east and south; because of the unsurpassed steam and electric railway, bus and trolley service the lines entering the city supply transportation to a territory having a population of 250,000, all within a radius covered by a short ride.

Wholesale Houses: Groceries, 2; meats, 2; fruits, 1; miscellaneous lines, drugs, 2; tobacco, 2. Most of the wholesale houses are in Philadelphia, just across the Delaware River.

Number of Retail Outlets for Nationally Advertised Products: Passenger automobile agencies, 49—110 makes of cars; commercial auto. agencies, 5; automobile accessories, 105; automobile tire agencies, 55; bakers, 220; cigar stores and stands (including hotels), 317; confectioners (including hotel stands), 340; delicatessen, 20; dressmakers, 75; druggists, 109; dry goods, 197; department stores, 7; electrical supplies, 73; florists, 27; fruits, 150; furniture, 31; garages (public), 175; grocers, 661; hardware, 126; jewelry, 38; meat markets, 204; men's furnishings, 50; men's clothing, 24; merchant tailors, 157; milliners, 60; opticians, 12; photographers, 10; pianos (and miscellaneous musical instruments), 20; radio supplies, 20; restaurants (including hotels), 126; shoes, 106; sporting goods, 11; stationers, 10; women's apparel, 16.

Completion of these tunnels will provide quicker through access from New York to New Jersey, relieving the present great pressure on ferries, etc. To New York City, by Hudson Tubes, 10 minutes; by ferry boat, 15 minutes.

Principal Industries: Meat packing, soap and toilet articles, oils, paints, metals, foods, chemicals, wood products, textiles, shoes.

Manufacturing Establishments: Leading firms, Colgate & Company, Dixon Crucible Co., Durham Duplex Razor Co., Wm. Crane Co., Voorhees Rubber Co., Mueller Macaroni Co., Lorillard Tobacco Co., Ryerson Co., Woolsey Co., American Sugar Refining Co., Whitlock Cordage Co., A. B. C. Elevator Co., Davis-Bourneville, Ammon & Person, Eagle Printing Inks, John Mehl, Western Electric, Endicott Johnson.

Special Information: Jersey City has a water frontage of 10 miles, which adds greatly to its prosperity. It is the second largest city in the State, the county seat of Hudson County, which has a population of 629,154, approximately one-fifth of that of the State of New Jersey. It has more than one thousand acres of undeveloped land, suitable for industrial purposes. This fact tends to keep down the land costs and rentals far below the standard in Manhattan. Jersey City's prosperity is indicated by the sound economic conditions reflected by recent statements of banks reporting over $325,000,000 assets.

Residential Features: Jersey City is an ideal residential place. Homes consist mainly of one and two family houses. Many large apartment houses of the very newest and most modern type were recently erected and more under course of construction. The majority of the homes are owned by the tenants, there being a great demand for homes for working men employed in the various industries.

Retail Shopping Section: The principal shopping districts include Newark Avenue, Monticello Avenue, Jackson Avenue, Ocean Avenue, Westside Avenue, Central Avenue, Five Corners, and Journal Square.

Trading Area: The trading area of Jersey City is 19 square miles—This does not, to any extent, do justice to the amount of business enjoyed by local merchants. Thousands of dollars' worth of business comes from shoppers who reside many miles beyond the boundary of Jersey City area, who are attracted by the excellent transportation facilities via very fine bus, trolley and tube service.

Wholesale Houses: Groceries, 12; meats, 6; fruits, 2; hardware, 6; dry goods, 2; miscellaneous lines, 32.

Number of Retail Outlets for Nationally Advertised Products: Passenger automobile agencies, 53; commercial auto. agencies, 8; automobile accessories, 70; automobile tire agencies, 16; bakers, 134; cigar stores and stands (including hotels), 200 (chain, 3); confectioners (including hotel stands), 304; delicatessen, 168; dressmakers, 125; druggists, 150; (chain, 3); dry goods, 252; department stores, 16; electrical supplies, 45; florists, 47; fruits, 257; furniture, 56; furriers, 14; garages (public), 143; grocers, 761 (chain, 280); hardware, 76; jewelry, 52; meat markets, 76 (chain, 3); men's furnishings. 52; men's clothing, 42; merchant tailors, 125; milliners, 67; opticians, 19; photographers, 30; pianos (and miscellaneous musical instruments), 15; radio supplies, 32; restaurants (including hotels), 250; shoes, 127; sporting goods, 17; stationers, 163; women's apparel, 48.

The Elizabeth Daily Journal carries 95% of all National Advertising placed in this section —a rich trading area of over 200,000 population

THE Elizabeth Daily Journal completely covers one of the most productive fields for the national advertiser—untouched by any other newspaper. This clean, high grade, wholesome, newsy paper with an Audit Bureau circulation of 23,646 net paid, is positively read in the best English speaking homes in this constantly expanding community. With its concentrated unduplicated circulation, its gripping reader interest, and low milline rate, no national campaign list of papers omits the Elizabeth Journal. **Nearly ten million lines of advertising were carried during the first ten months of 1925.** The Elizabeth Daily Journal has won its undisputed leadership by consistently delivering results for more than three quarters of a century. The record of advertising lineage is definite proof of its unequalled value as an advertising medium.

Location: Newark is located on Newark Bay and the Passaic River. It is an important section of the Port of New York and the overflow from Manhattan has started on its way to Newark insuring great strides and rapid development for the next few years. This, coupled with the rail and water connections and the natural growth of the great industries already here, makes Newark a most opportune city for real estate investment or the location of productive enterprise. Newark is eight miles west of New York with a twenty-minute running time for trains between the two great cities.

Five trunk railroads serve Newark giving it exceptional service to all parts of the country. The city is within convenient trucking distance of New York and river lines give direct connection with ocean shipping. As a railroad point it enjoys the low competitive water rates on all railroads. One ocean line makes Newark its home port and the city has a service extending over the lines of the New York barge canals. To New York, by railroad, 30 minutes; by Hudson Tubes, 20 minutes; by auto, 45 minutes.

Principal Industries: Electric machinery, apparatus and supplies, foundry, machine shop products, leather, jewelry, printing, publishing, bread and bakery products, thread, auto parts, radio supplies, leather goods, incandescent lamps, paints and varnish, chemicals, dyes, advertising novelties, imitation leather.

Manufacturing Establishments: 2,950. Leading firms, Rubberset Co., Splitdorf Electrical Co., Weston Elec. Instrument Co., Whitehead & Hoag, Durant Motor Co., Crucible Steel Co. of America, Edison Lamp Works of General Elec. Co., Hyatt Roller Bearing Corp., Worthington Pump & Machinery Co., Clark Thread Co., Nairn Linoleum Co., Thomas Edison, Inc., Monroe Calculating Machine Co., Crocker-Wheeler Co., General Lead Batteries Co., Westinghouse Lamp Co., Celluloid Co., Western Electric Co., Mennen & Co., Federal Ship Building Co., Sherwin-Williams Co., Pyrene Mfg. Co., Sears-Roebuck Co., Ault & Wiborg Co., Central Stamping Co., Murphy Varnish Co., L. E. Waterman Co., Waitt & Bond Co., Valentine & Co., Otis Elevator Co., Ford Motor Co., Hatcher Furnace Co.

Special Information: Newark ranks among the leading industrial centers of the United States in volume and diversity of manufacture. While New Jersey ranks tenth in population among the States of the Union, it ranks sixth in wealth. This wealth is largely concentrated in Newark, the largest city in the State. Because of its strategic position and the colossal development now under way at Port Newark, the logical terminus in the expansion of the port of New York, Newark will shortly be recognized as one of the most important seaports on the Atlantic coast.

Newark has twenty-one freight depots, fifteen passenger depots and seventeen delivery yards. It is served by the Pennsylvania; Central Railroad of New Jersey; Erie; Delaware, Lackawanna & Western; Lehigh Valley and Hudson & Manhattan Railroads. Freight tonnage by rail in 1923 was 6,093,464 and by water 5,934,542 tons, making a total freight movement for the city of 12,028,006 tons. Express movement was 1,479,445 packages.

Residential Features: Of the 37,011 dwellings in Newark, 25,353 are one and two family houses. Newark's suburbs, including the Oranges, Montclair, Glen Ridge, Bloomfield, Maplewood, Madison, Millburn, Short Hills, Arlington, Chatham, Summit, Morristown, and other communities along the Lackawanna, are the most desirable in the metropolitan district.

Retail Shopping Section; Extends on Broad street from the Lackawanna Station to Lincoln Park, 20 blocks, and at right angles on Market street, from the Pennsylvania Station to the Court House, 10 blocks. Outlying shopping sections are known as Clinton Hill, Springfield avenue, Roseville, Forest Hill and Ironbound.

Trading Area: Extends in fan shape for about 25 miles and is served by five trunk lines of railroads, and trolley, bus and motor truck systems, all affording quick and efficient service.

Wholesale Houses: Groceries, 25; meats, 27; fruits, 40; hardware, 3; dry goods, 4; bakers, 6; druggists, 7; stationers, 7; furniture dealers, 2; cigars, 5; confectioners, 35; coal dealers, 15.

Number of Retail Outlets for Nationally Advertised Products: Passenger automobile agencies, 86; commercial auto agencies (Motor Trucks only), 5; auto accessories, 156; auto tire agents,

Facts as Factors

THE importance of a newspaper and its value to the advertiser is determined by its PROVEN standing in the community it serves and its reputation in the country at large.

T IS A FACT that the NEWARK EVENING NEWS is HOME DELIVERED to eight out of every ten of the English speaking families in its territory.

IT IS A FACT that the NEWARK EVENING NEWS is an important factor in the home life of Northern New Jersey and, as such, its influence grows stronger day by day.

IT IS A FACT that, as an advertising medium, the NEWARK EVENING NEWS ranks among the leaders in the United States.

PROOF that shrewd advertisers recognize these facts is found in the following record of achievement.

AMONG the more than 1500 six-day newspapers published in the United States, the NEWARK EVENING NEWS, during the first six months of 1925, in volume of advertising, ranked as follows:

FIRST in NATIONAL ADVERTISING.
FIRST in AUTOMOBILE ADVERTISING
FIRST in CLASSIFIED ADVERTISING
THIRD in TOTAL ADVERTISING

These Facts should be Factors in determining your Advertising policy in this important section of the Metropolitan District.

What Has 1926 in Store for You?

THE PRESS-GUARDIAN was the one paper in Paterson selected by "The 100,000 Group of American Cities" for its famous publication: "A Study of 81 Principal American Markets."

That's a question which forces itself into the mind of every live agency executive as well as advertiser at this particular time. A New Year is before you. In a large measure it's up to you to make it a successful one—profitable to you and your clients as well.

As providing the most intensive single coverage of the greatest purchasing power of the population in Paterson, THE PRESS-GUARDIAN was the only paper picked in that city by Jason Rogers, Editor of The Advertisers' Weekly.

IF YOU SHOULD HAPPEN TO BE ONE WHO DID NOT USE

THE PRESS-GUARDIAN

Paterson's leading evening newspaper, in 1925, we would welcome an opportunity of demonstrating its result-producing power.

THE PRESS-GUARDIAN made greater advertising gain in 1925 over 1924 than any other local paper.

To the many advertisers, local and national, who used its columns profitably during the year which is rapidly drawing to a close, The Press-Guardian expresses its thanks, and the success which attended their campaigns in the past is the strongest reason why it hopes for continued opportunities to serve them in the coming year.

The thriving condition of Paterson's banks augurs well for a prosperous future,—showing as they do total resources of $133,465,371, or a gain of $18,805,846 over last year, while the savings deposits show a total increase of $9,206,676; or a grand total of $71,034,970.

Paterson and all Northern New Jersey is experiencing a big boom in connection with the opening of the new vehicular tunnel in 1926 and the proposed bridge across the Hudson River, connecting New York and New Jersey, and the North Jersey Rapid Transit Commission estimates a growth in population of 50,000 in Paterson in the next five years. Yes,—Binghamton Is In the 100,000 Class

Binghamton, Johnson City, Endicott, Port Dickinson and Union are practically one community so far as the national advertiser is concerned. They are all so closely interwoven that it is difficult to tell where one leaves off and the other begins. This community has a population of 110,000 with 258 factories employing 33,000 workers, an industrial payroll of more than $50,000,000 and with a manufactured output valued at more than $160,000,000 per year.

Binghamton, the great metropolis of south central New York State, is a great jobbing and wholesale center controlling retail outlets in a large territory.

Binghamton therefore belongs in any advertising campaign which contemplates cities of 100,000 population or more.

The great variety of its manufactured products and the general prosperity of its residents make Binghamton newspaper advertising unusually and quickly responsive.

The BINGHAMTON PRESS, published every evening except Sunday, has over 34,000 daily circulation in this exceptional field. It is known and recognized everywhere as an advertising medium of extraordinary merit, not only because of its large circulation, but its remarkable dealer and reader confidence.

The Merchandising and Promotion Departments of the BINGHAMTON PRESS are especially fitted to assist not only BINGHAMTON PRESS advertisers in distribution problems and dealer cooperation, but to help other manufacturers not already represented in Binghamton to secure jobber or distributor connection as well as retail distribution.

Send for a copy of the BINGHAMTON PRESS AD-VISER—a 16-page publication that will be worth your while.

We will tell you more about the wonderful Binghamton territory, at any time, anywhere.

NEW YORK CITY

Foreword

The Greater New York market, colossal as it is, is still a well-defined quantity and is surveyed and chartered by boroughs. The pertinent facts have been gathered and brought up to date and the quantitative analysis is made under the standardized arrangement used in all EDITOR & PUBLISHER Space Buyers' Chart.

This market, one of the greatest in the world, rapidly changes and its influence is widespread and affects the markets of the entire country.

New York is the most important city, industrially, commercially and financially, as well as in population, in this country. It manufactures one-twelfth of all products made in the United States and handles one-half of the country's foreign commerce.

As a market it towers above every other business center in the world. With a population of over 8,000,000 in and around the city it is the largest single market in the world and influences all markets of the nation.

First *in the* Greatest Market

ADVERTISERS seeking greater markets for their products find that the purchasing power of the New York metropolitan area, the nation's industrial, financial and residential capital, is more quickly and inexpensively reached through the columns of The New York Times than through any other medium.

The New York trading area has 8.5% of the United States population and 11.5% of the national income.

The New York Times is the foremost newspaper in the New York market.

The Times publishes the largest volume of advertising of any New York newspaper—more than 25,500,000 lines in eleven months of 1925—approximately 8,700,000 lines more than the next New York newspaper.

Subjecting all advertising to a censorship to exclude the false and misleading, The Times maintains the highest standards for whatever is admitted to its columns.

The New York Times circulation of 382,005 copies, average daily and Sunday, represents the largest group of intelligent, discriminating and substantial readers ever assembled by a newspaper and exceeds that of any other New York morning newspaper of standard size.

The amount of money on deposit with the Postal Savings System is more than $53,200,000.

Deposits in New York Savings banks within twenty-five years have multiplied nearly four times.

The depositors of 1920 had an average savings account of $432.51, while the 3,031,185 depositors of today in New York City show an average savings deposit of $1,231.55. Total deposits in 65 savings banks, on January 1, 1925 were $2,557,763,696.

The clearing house transactions for the year ending Sept. 30, 1925 were:

Exchanges	$276,873,934,638.08
Balances	29,721,103,273.49
Total Transactions	$306,595,037,911.57

The Clearing House Association is now composed of 14 national banks, 9 state banks, and 11 trust companies. The Federal Reserve Bank of New York and the Clearing House City Collection Department also make exchanges at the Clearing House, making 36 institutions clearing direct. There are 6 banks and trust companies in the city and vicinity, not members of the association, that make their exchanges through banks that are members.

THEATRES

In the city there are 741 theatres seating 747,567.

These include 179 open air theatres; 63 motion picture and vaudeville, 11 vaudeville, 79 houses devoted to productions, 14 burlesque houses and 9 concert halls.

The average seating capacity of all the motion picture theatres is 905. The average of vaudeville houses is 1,507, burlesque, 1,394, productions, 1,305. The average seating capacity of all classes of theatres is 705.

The largest motion picture theatre is the Capitol, seating 4,624 people comfortably. The Hippodrome seats 5,190 people and has lately been changed to a vaudeville house. The Strand, Rialto and Rivoli theatres, devoted to motion pictures exclusively, seats 2,989, 1,960 and 2,122 respectively. The E. F. Albee Theatre, recently constructed in Brooklyn and devoted exclusively to vaudeville seats 3,256 persons.

The home of Grand Opera is the Metropolitan Opera House. More recently The Manhattan Opera House, the Lexington Avenue Theatre and the Century are also used for Grand Opera at times.

The most widely known carnival, exhibition, circus and sport arena is the New Madison Square Garden.

Carnegie Hall and Aeolian Hall are two of the most famous auditoriums devoted to classical concerts.

LOCATION AND TRANSPORTATION

New York City is located in the extreme southeastern corner of New York State, being situated around the mouth of the Hudson River.

New York City consists of the extreme southeastern corner of the mainland of New York State, together with two islands in New York Harbor and a portion of the extreme end of Long Island.

New York is the terminus of thirteen great railroad systems: New York Central R.R., New York, New Haven & Hartford R.R., Pennsylvania R.R., Baltimore & Ohio R.R., Central R.R. of New Jersey, Erie R. R., Lackawanna R.R., Lehigh Valley R.R., Long Island R.R., New York, Ontario & Western R.R., West Shore R.R., New York, Susquehanna & Western, and Philadelphia & Reading R.R. These lines extend to and connect with lines extending to all parts of the United States.

A belt line connecting all railroads by car floats, lighters and steamers is maintained in the interest of the general public by the Municipal and Federal governments. This is the most extensive complete interior belt line in the world, the maintenance of which does not fall on the users.

In the City of New York there are eight terminals of the State Barge Canal. These terminals place all of the advantages of the $150,000,000 deeper and wider State Barge Canal at the disposal of the shippers of New York City, and materially reduce the cost of transportation of raw materials and manufactured products.

There are fifteen electric surface railway companies and two motor bus companies serving New York City.

Three subway systems serve New York's local passenger traffic. The B. M. T. System, consisting of three lines, the Fourth Avenue Line, the Broadway line and the Queensboro line, runs through the lower part of Manhattan and connects this borough with Brooklyn and Queens, by means of tubes under the East River. The Interboro Subway System is made up of two lines, the East Side and West Side lines with connections between both lines in Manhattan and Brooklyn. These lines run through Manhattan, and The Bronx and are also connected with Brooklyn and Queens by means of tubes under the East River. The third subway system is the Hudson and Manhattan Railway Company which runs through the lower part of Manhattan, connecting it with Jersey City, Hoboken and Newark in New Jersey by means of two sets of tubes under the Hudson River. These subway systems, therefore, provide rapid transit from the extreme northern points of Manhattan, Bronx and Queens to the extreme eastern points of Brooklyn.

Another highly efficient source of rapid transit is afforded by the city's elevated systems of which there are two, the Interborough and the New York Rapid Transit Company. The Interborough operates four elevated lines between Manhattan and the Bronx. The New York Rapid Transit Company operates an elevated line which connects Brooklyn with all the outlying districts of Richmond Hill, Jamaica, Brighton Beach, Canarsie and Coney Island. All of the subway systems, except the Hudson and Manhattan run on elevated structures in the outlying districts of the city.

Nine municipal and twenty-nine privately owned ferry lines serve to connect Manhattan and The Bronx with Brooklyn, Queens, Richmond (Staten Island), New Jersey and the various islands in the harbor, and four great bridges over the East River, Brooklyn, Williamsburg, Manhattan and Queensboro, connect Manhattan with Brooklyn and Queens.

PRINCIPAL INDUSTRIES

The stupendous totals in the following list of manufacturing lines show New York's industrial importance. The significant figures are the percentages of total production in the United States which this city manufactures.

The essential facts concerning New York City's manufacturing industries are shown in the following table:

New York City manufactures more clothing, millinery and lace goods, feathers and plumes, fur goods, tobacco pipes and cigar and cigarette holders, hat and cap materials and artificial and preserved flowers and plants, than all of the rest of the country combined, according to the 1923 Census of Manufacturers.

The same census, which is the last one for which complete figures are available, shows that the New York output exceeds that of all of the rest of the country in lapidary work, hair work, and music printing and publishing.

Those who are accustomed to think of New York only in terms of skyscrapers, banks, theatres and shopping centers, will be surprised to learn that approximately 14 per cent of the country's manufacturing establishments are located in New York City, and that in 1923 these establishments produced more than one-twelfth of the country's total manufactured products.

The value of the products manufactured in New York City in 1923 was $5,349,077,002, which is greater than the combined value of the manufactured goods produced in all of the New England States together except Connecticut, or in all of the States west of the Mississippi together except California, Texas, Minnesota and Missouri, in that year.

New York's 27,493 manufacturing establishments employed an average of 579,000 workers during 1923, which is more than the total population of such cities as Pittsburgh, Buffalo, San Francisco and Los Angeles, according to the last census figures.

Where New York Leads All

It is not generally appreciated that New York leads the country in the production of many items in common use and manufactures a very large proportion of many others. The extent to which certain industries are concentrated in New York City is shown on the accompanying table:

Table Showing Industries Which Are Concentrated in New York City, Taken From U. S. Census of Manufactures, 1923

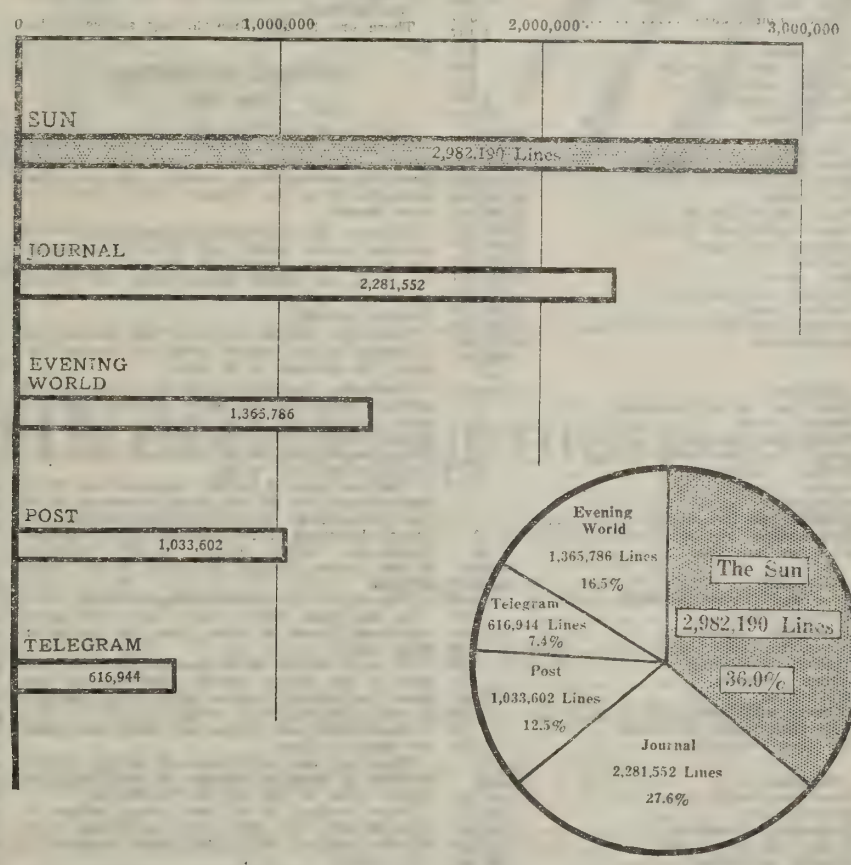
Leadership Built On Results



In Metropolitan New York where the sales opportunities are larger than in any other market in the world, The Sun is recognized as the most effective sales producer for merchandise of good quality.

Year after year and month after month, National Advertisers use far more space in The Sun to sell their products to the people of this territory than they use in any other New York evening newspaper.

RECORD OF NATIONAL ADVERTISING

NEW YORK EVENING NEWSPAPERS

AGATE LINES — FIRST TEN MONTHS OF 1925.

The Sun's GAIN in National Advertising during the first ten months of 1925—a gain of 592,976 lines—was larger than the COMBINED GAINS of all the other New York evening newspapers.

The Sun's superior ability to produce results for advertisers is based on its large, high-class and unusually responsive circulation.

PORT OF NEW YORK.

The total land and water area within the Port District depends upon the boundary one chooses to give it. Within a 50-mile radius of the lower end of Manhattan there are 8,290 miles. Within the area chosen by the Russell Sage Foundation for their Greater New York and "Its Environs Study," which includes 10 counties in New York and 11 in New Jersey, there are 5,522 square miles. Within the area used by the consulting engineer of the New York Transit Commission in his Metropolitan Plan, there are 3,766 square miles. The Port of New York Authority's boundary encloses 1,463 square miles. The Metropolitan District, defined by the United States Government in its last census of the City itself and all minor civil divisions in the suburban territory within 10 miles of the city boundaries that have a population of 150 or more per square mile, contains 1,193 square miles.

Of the area enclosed by the Port Authority's boundary, 368 square miles are covered by surface water (of which some 250 square miles are sheltered).

Improved shore front in New York aggregates 53 miles, or 20% of the total. New Jersey improvements aggregate 30 miles, or 15% of the total.

Of the 483 miles of shore front, 277 are in New York and 206 in New Jersey. The New Jersey mileage includes the potentially navigable parts of the Raritan, Passaic and Hackensack Rivers. The waterfront measured around the piers totals approximately 615 miles.

Area in square miles and the length of shore fronts in miles for the waters navigable, and potentially navigable included in the Port of New York Authority area:

	Water Area	Shore Line
Hudson River	24.0	56.0
Harlem River	1.2	15.0
East River	4.0	17.5
Passaic River	15.0	50.0

Open Sea in Port Authority area..	149.0	18.0
Grand Total	400.0	483.0

Of the 483 miles of shore front, approximately 277 miles are in New York and 206 miles in New Jersey.

Lines operating from the port:
97 Lines to Northern and Western Europe.
68 Lines to points in the Mediterranean Sea.
47 Lines to South American ports.
34 Lines to West Indies, Central America and Caribbean Sea.
29 Lines to Asiatic and Australian ports.
16 Lines to east and west coast of Africa.
14 Coastwise lines to New England.
8 Lines to Hudson River points.
6 Coastwise lines to South Atlantic and Gulf ports.
2 Barge lines to Philadelphia and Baltimore.
2 Barge lines to Buffalo via New York State Barge Canal.

There are 12 rail lines having access to the port.

GENERAL INFORMATION

The City

The City of New York comprises five boroughs —Manhattan, Bronx, Brooklyn, Queens and Richmond. Manhattan covers New York County, Brooklyn covers Kings County, and the other boroughs cover the counties from which they were named.

The city (five boroughs) of New York has an extreme length, north and south, of 36 miles, and an extreme breadth of 16½ miles, measuring from the North River along 23d Street, Manhattan and thence to the easterly border of Queens Borough.

From the western border of the Borough of Richmond to the eastern border of Queens Borough, the distance is 25 miles.

Manhattan Borough is 12½ miles long; and its extreme breadth is 2½ miles; Bronx, length 8.1 miles, breadth 9.2 miles; Brooklyn, length 11.5 miles, breadth 10.3 miles; Queens, length 15.1 miles, breadth 13.7 miles; Richmond, length 15.5 miles, breadth 7.0 miles.

The total area of the five boroughs and of the incorporated City of New York, according to the Tax Department, is 314.75 square miles. By acres, the areas of the boroughs as as follows: Manhattan, 14,038; Bronx, 26,017; Brooklyn, 49,709; Queens, 75,082; Richmond, 36,000; total, 201,446.

The city is the world's financial center.

In the whole country there are 2,900 export merchants listed, of these 2,400 are located in New York.

It is one of the three greatest furniture centers of the United States, especially in high grade and special designs, which trade amounts to what virtually is a monopoly.

More shirts and collars are made here than are made in Troy.

There are more establishments with a greater number of employes engaged in the metal industry than in the city of Pittsburgh.

Paper products in all lines yearly amount to $100,000,000. It is the largest publishing center of the country, with 3,286 firms engaged in these lines.

More shoes are produced here than in St. Louis, Lynn, or any other city except Brockton.

New York, with its trading population totaling in the city and suburbs 9,207,466, with 13,000,000 within a 100-mile radius and 23,000,000 in a 200-mile radius, is the greatest consuming market in the world and of the widest variety of goods.

Using a traffic year of 340 days, the Transit Commission's figures for 1924 showed an average of 728,307 daily commuting trips in and out of New York City, while the total daily traffic averaged 989,617 passengers. The Commission estimated from these figures the number of commuters as 364,153 and the number of daily visitors, including some from the commuting zone who paid full fare, at 130,650.

During 1924 the travel into and out of New York City totaled 385,410,632 passengers, of which the railroads carried 243,589,271.

The travel originating within 40 miles of the ity in 1923, in the so-called metropolitan district, was 289,000,000 passengers, of which 146,000,000 were railroad commuters, 44,000,000 were other railroad passengers, 56,000,000 came and went by ferries, and the Hudson and Manhattan tubes handled 43,000,000.

Of the 190,000,000 railroad passengers, 60,000,000 were from Long Island, 33,000,000 from Westchester and Connecticut, and 97,000,000 from New Jersey.

In a day, 2,440 railroad trains enter the city, of which 327 bring commuters from 8 A. M. to 9 A. M.

New York City uses more electricity than twelve European countries with a combine population of 109,000,000. This City uses in year approximately five billion kilowatt hou of electricity, whereas, the combined productio of all the generating plants in Greece, Denmark Latvia, Jugo-Slovakia, Poland, Hungary, No way, Rumania, Turkey, Switzerland, Swede and the Netherlands last year was slightly les than 5,000,000,000 kilowatt hours.

The circulation of books from public librarie in New York City was approximately 20,000,0 volumes last year.

A recent survey of the density of urban popu lation shows that New York City has more tha 19,000 population to the square mile, not allow ing for commuters and transients. It ha 17,786 population to the square mile in 191 In Manhattan there are 103,045 to the squa mile.

The fact that New York City is one of th greatest summer resorts in the world is ofte overlooked even by New Yorkers themselves.

New York City has over 500,000 automobile

The city has appropriated $20,500,000 for th purpose of constructing terminal markets i Bronx, Manhattan and Brooklyn. These wi serve as storage houses and distributing cente for foodstuffs arriving in New York from a parts of the country.

WHY expect pigmies to do gigantic jobs?

Nine million people cannot be reached, covered told or sold by small circulations! America's greatest, richest market deserves and repays maximum selling and advertising effort. The national advertiser in New York needs The News first and most—because it covers the market with the largest* circulation ❦ because it reaches all kinds and classes of people in all parts of the city and suburbs ❦ because the small page and tabloid paper get the copy seen ❦ because it affords more advertising at less cost ❦ ❦ Get the facts!

New York City (con't)

Metropolitan New York consumes on an average 513,916 pounds of citrus fruit annually. The orange is shown to be New York's favorite fruit, the average annual consumption being estimated at 361,627,500 pounds, or about 60 pounds per capita of population. In 1922 the receipts of this fruit were 8,050 carloads, while in 1923 they were 12,133 carloads. The demand for grapefruit grew even more rapidly, increasing from 2,134 carloads in 1922 to 3,681 carloads in 1923.

The Italian Market of Greater New York.

The Italian population of Greater New York amounts to 390,832, according to the last census. This constitutes 19.6% of the foreign born white population among the 36 foreign countries represented. Within the metropolitan area there are appoximately 850,000 Italians.

This population is distributed by boroughs as follows:

Bronx	39,519
Brooklyn	138,245
Manhattan	184,546
Queens	19,794
Richmond	8,728

Most of the Italian population is engaged in gainful pursuits and every trade, business and profession has its Italian principals and Italian trade. The baking, stove and machinery trades employ the greatest number of Italians.

The Italian sections of the city are defined in the sixteen following outlines:

From Park St. to Christopher St. and from the Bowery to West Broadway.

From Madison and Roosevelt Sts. to 16th St., Bowery to river front.

From 26th St. and 7th Ave. to 40th St. and 11th Ave.

From 90th St. and First Ave. to 128th St. and river front, above 105th St. from Lexington Ave., to river.

From 14th St. and Morris Ave. to 156th St. and Morris Ave.

From 180th St. and Third Ave. east to Southern Boulevard up to 200th St.

Williamsbridge section, from 200th to 228th Sts. and White Plains Ave.

Williamsburg section.

South Brooklyn, principally Union, Columbia and President Sts.; Borough Park from 38th St. to 62d St.

Entire Bensonhurst section.

Queens, from Third to 11th Sts. on Manhattan Ave.

Staten Island, St. George.

The Ozone Park section of Queens.

A section of Astoria and throughout Corona.

These sections are among the most thickly populated in the city.

There are 6,000 Italian grocery stores in New York and vicinity catering to both American and Italian trade.

There are 1,000 of these catering exclusively to the Italian trade.

In all other lines of merchandise the stores cater to a general trade.

There are 1,700 Italian bakers. In this connection in the American bakeries Italian bakers lead all others among the number of employees.

In the wholesale business on all products in food and other lines from Italy and other countries, the Italian jobbers sell the people of the entire nation.

The largest number of depositors in the savings and postal savings banks are of the Italian race.

The Jewish Market of New York

Next to the American market the Jewish is probably the most important and most lucrative in New York City. More than 1,600,000 Jews live and work in the Metropolis. They are concentrated in several distinct sections. About 668,000 live in Manhattan, 215,000 in the Bronx, and 555,000 in Brooklyn.

More than 5,000 grocery, dairy and delicatessen stores, 1,200 drug stores, several thousand dry goods and specialty shops are located in the Jewish sections and cater exclusively to Jewish trade.

There are twenty Yiddish theatres in Greater New York. There are 12 Jewish banks with 50 branches in the Jewish sections and have a total resources of more than four hundred million dollars, of which about seventy-five millions are savings accounts.

The Jews of New York are engaged largely in mercantile and professional pursuits, a large number of them are skilled artisans employed in the needle, shoe and textile industries. These trades are highly unionized and the workers employed earn proportionately higher wages than workers in other industries.

Because of its compactness, the Jewish market is easily accessible to the American advertiser and can be merchandised at a proportionately low cost.

Bronx—Special Information

The Bronx covers an area of 42 square miles and has a water frontage on three sides. The water front at Port Morris, a section of The Bronx, touches water deep enough to accommodate trans-Atlantic liners, and in time it is expected that The Bronx will serve as terminus for trans-Atlantic trade.

More pianos and musical instruments are made in The Bronx than in any other part of the United States. The vast plants of the Estey and Welte-Mignon Piano companies are located here.

The Bronx is also the home of the Fleischman Yeast Company, one of the largest of its kind.

Dr. Posner's Scientific Shoes are made in The Bronx. This is one of the leading shoe manufacturing concerns in the country.

The Bronx has a wonderful system of parks and parkways, the total acreage amounting to 4,000 acres. The famous Bronx Park Botanical and Zoological Gardens are located here.

Recent monthly totals of expenditures for new business and residential structures in the Bronx amount to $12,000,000 to $15,000,000.

Brooklyn—Special Information

Brooklyn leads the world in the manufacturing of wedding rings. Brooklyn has more children in school than any other city with the exception of Chicago.

Brooklyn ranks first in the world as a coffee importing and distributing center. Over 60% of the coffee used in the United States passes through Brooklyn.

Brooklyn leads the United States in the importation and preparation for distribution of olives, importing over 3,000,000 gallons per year.

Brooklyn has more warehouses than all the other boroughs of New York combined.

The extent of wharfage from the 111 commercial piers in Brooklyn is over 25 miles.

Newtown Creek, having a length of less than four miles, is known as one of the world's busiest waterways. More cargo is shipped over Newtown Creek in one year than is shipped over the entire Mississippi River in the same time.

Brooklyn has one of the largest floating dry docks in the world.

Brooklyn has one of the longest commercial piers in the world.

Brooklyn has the greatest single dock system in the country, the New York Dock Company, including 34 piers, covering a water front of over two miles.

Over 700 ships claim Brooklyn as their home port.

The most up-to-date terminal warehouse system is the Bush Terminal, which has seven of the largest piers in the U. S., and in addition has 14 manufacturing buildings with a total area of over 7,000,000 square feet. These buildings occupy practically 300 acres, having almost 300 different tenants employing over 25,000 people.

Brooklyn is fourth from the standpoint of industry in the United States.

It has approximately one-quarter million workers engaged in 10,000 manufacturing establishments.

Brooklyn has 84 financial institutions, and over 30,000 retail stores.

Ships leave our Brooklyn docks for almost every important port in the world, whether it be Asia, Africa, South America, North America, or Australia.

Queens—Special Information

The Borough of Queens occupies an area of 117 square miles, or 37.4 per cent of the total area of New York City. The assessed valuation of land in the borough for 1925 was $1,163,360,145.

Queens has ten miles of beaches on the Atlantic Ocean, Long Island Sound and Jamaica Bay, and has twenty parks, with a total area of 1,180 acres.

Queens ranks among the first fifteen cities in the United States in importance of manufacturing.

It is connected with Manhattan by three tubes under the Hudson River and by the Queensboro Bridge. It is also connected with the Bronx by New York Railroad Bridge over Hell Gate.

Queens Borough is made up of 64 smaller communities.

Building activities in Queens are progressing at a tremendous rate. During the first nine months of 1925, plans were filed for 19,946 new buildings, including private homes, private garages, apartment houses, public buildings, office buildings, stores, schools, churches and theatres. The cost of these buildings amounts to $135,242,435.

There are 200 miles of trolley tracks and 50 miles of elevated tracks in the borough.

Richmond—Special Information

The Borough of Richmond is located on Staten Island in New York Bay. It is fourteen miles long, seven miles wide and embraces an area of 57 square miles. It is connected with Brooklyn and Manhattan by municipal ferries, and The Bronx, Queens and adjacent suburban territory can be reached from Richmond by subway through Brooklyn and Manhattan. It is also served by ferries to New Jersey towns.

It is mainly a home community, having an area three times as large as Manhattan, with one-twentieth of the population. There are, however, a number of important industries located here, such as Borden's Farm Products Co., U. S. Gypsum Co., American Linseed Co., Standard Varnish Works, Tottenville Hat Works, Sun Soap Products, Inc., West New Brighton Iron Works, National Dry Dock & Repair Co., Rubsan & Hormann Brewing Co., Empire State Silk Label Co. and Hudson Waist Co.

Richmond has thirty-five miles of water front and twenty-one piers, each one thousand feet in length and equipped with most modern freight-handling devices. These piers are capable of handling over 12,000,000 tons of goods per year.

There are 326 miles of good roads in Richmond. Of these, 294 miles are paved, 30 miles being constructed of reinforced concrete.

The park system of Richmond embraces 175 acres, and there are five miles of modern bathing beaches along the shore front.

Transportation is furnished throughout the island by electric trolley systems, and one electric railroad and one steam railroad run from one end of the island to the other.

Nine steamship companies dock their ships at Richmond.

The increase in the value of real estate in Richmond over 1917 is 79.63%.

RESIDENTIAL FEATURES

The city is one of change. The residential section of Fifth Ave. has become a shopping section as far north as 59th St.

Riverside Drive is changing from a street of one-family residences to one of apartments both large and small.

Park Avenue has grown to be the center of the exclusive apartment house section.

Sub-divisions have developed rapidly in Brooklyn consisting mainly of one-family houses.

Queens is a borough of detached houses and homes though there are some apartments in Corona and other sections.

Richmond is a section of one and two-family houses.

The Bronx is changing to an apartment house area.

Excess of Families Over Dwellings in New York City

(U. S. Census figures, as of Janury 1, 1920.)

The following table shows the number of families in the City of New York that have no separate dwelling for their own occupancy, but occupy a home in common with others.

	Dwellings.	Families.	Excess of Families Over Dwellings. Number.	Pct. Total Families.
New York City	365,963	1,278,341	912,378	71.
Bronx	33,985	166,260	132,275	79.
Brooklyn	173,847	453,587	279,740	61.
Manhattan	75,534	525,154	449,620	85.
Queens	64,323	109,559	45,236	41.
Richmond	18,274	23,781	5,507	23.

The word "dwelling," as used in U. S. Census tables, means any building or structure in which one or more persons regularly sleep. It may not be a house in the usual sense of the term.

An entire apartment house constitutes but one dwelling.

The word "family," as used in U. S. Census tables, means a group of persons, whether related by blood or not, who live together as one household, usually sharing the same table.

Thus, one person living alone is counted as a family, and all the people in the hotel, boarding house or institution constitute but one family.

East Broadway and Division St.

Broadway, Manhattan, undoubtedly one of the longest avenues of trade in the world, is nothing more or less than a series of shopping centers joined by an almost continuous line of small retail establishments of every known character.

The extreme southern end of this avenue is devoted principally to office buildings familiarly known as "New York's skyscrapers," but even in this center of finance and international trade, there is an unbroken chain of retail establishments. From this point north, Broadway is a combination of retail and wholesale establishments of various sizes. In mentioning the principal retail shopping districts as briefly outlined here, we merely refer to the "heart" of a district. The national advertiser will find avenues of trade leading into each of these centers from all sides, varying in length according to the location and character of the residents in each neighborhood.

Of course, the most widely known retail section is the famous Fifth Ave. shopping district, which extends from 23d St. to 59th St.

A brief outline of New York City's retail sections would not be complete without reference to the East Side, where congestion causes retail conditions quite different from anything found elsewhere. The heart of this trading district is on East Broadway, Division St., the Bowery and neighboring streets such as Orchard, Essex, Grand, Henry, Madison and others. It is here that retail trade has reached beyond the limits of housing facilities and the famous East Side pushcart merchant has become a close rival to the shopkeeper.

The pushcart markets, however, extend all over the Greater City, not being confined to the lower East Side, where, however, they are thickest. A recent survey shows that there are 58 open air public markets in the city. Of these, 38 are in Manhattan, 2 in the Bronx and 18 in Brooklyn. Over 7,860 pushcart peddlers are licensed by the city government to do business in these markets. They sell articles of food and wearing apparel, and the average sale price is fifteen cents. The gross business for one year in the markets approximates $45,500,000.

The public markets are located in centers of population five times as intensive as in any other part of the city. They serve a total of more than 1,500,000 people. The markets supply a means of support for 31,000 dependents of whom 89 per cent are foreign born or of foreign parentage, 6 per cent are native born whites and 5 per cent are Negroes. At least two-thirds of all this number are either Jewish or Italian. Sixty-eight per cent of the venders deal in fruits and vegetables with a retail value of approximately $35,000,000 annually; 4 per cent deal in other foods with an annual value of about $1,500,000; and 28 per cent retail merchandise worth about $9,000,000 per year. Seventy-two per cent of the venders are Jewish, 22 per cent Italian, and the remaining 6 per cent is divided among German, Irish, Russian, Spanish and American. But 63 per cent are citizens.

Eleven per cent of all the fruits and vegetables supplying the city are retailed through the pushcarts. Some of these open air markets extend for a distance of 15 blocks. It is further reported that half the sales are on Saturday and a third on Thursday.

Principal Shopping Districts of Bronx

In the Borough of the Bronx there are many neighboring sections which afford wide distribution for nationally advertised products, especially in the food line.

The principal shopping centers of this borough are six in number, each of which presents exceptional marketing possibilities. In several instances the shopping centers are even larger than many retail sections of the average American city. These six shopping districts are located at Third Ave. and 139th St., Third Ave. at 149th St., Prospect Ave. at 160th St., Southern Boulevard at 163d St., Tremont Ave. at Prospect Ave. to Boston Post Road, University Ave. to Third Ave. on Fordham Road.

Principal Shopping Districts of Brooklyn

In South Brooklyn the principal shopping district is on Fifth Ave. for many blocks. In Brooklyn proper the "Borough Hall Section" represents the heart of the retail district, the principal avenues of trade are Fulton St., Flatbush Ave. and adjoining streets. Flatbush Ave. extends out to the Flatbush section and is the principal avenue of retail trade in this section. Kings Highway is also an important shopping avenue for Flatbush. In the Williamsburg and Bushwick sections Broadway is the main avenue of retail trade. Stores and shops of every description from complete department stores to the smallest specialty shops are found along the highway of trade extending from the Williamsburg Bridge Plaza east for a distance of more than thirty blocks. Two particularly busy centers along this highway are at Broadway and Flushing Ave. and Broadway and Lexington Ave. Other important avenues of trade in these two sections are Ralph Ave., Reid Ave., Throop Ave., Tompkins Ave., and Nostrand Ave. which extend for quite a distance. Nostrand Ave. extends out to the Bedford section and together with Franklin Ave. forms the main retail section of this part of Brooklyn. In the Greenpoint section, Manhattan Ave. is the main channel of retail trade.

Principal Shopping Districts of Queens

As this borough has grown from the gradual uniting of popular neighborhood sections, it is natural that each of these districts should have a trading center such as Woodhaven, Richmond Hill, Jamaica, Whitestone, College Point, Flushing, Corona, Astoria, Long Island City and Ridgewood.

Jamaica Ave. is almost a continuous shopping street from Elder's Lane in Woodhaven, through Woodhaven, Richmond Hill Jamaica and beyond to Harvard Ave.

In Whitestone there are two sections—150th St. from Sixteenth Road to 11th Ave., 14th Ave. from 148th St. to 152d St.

In College Point the retail districts are at 122d St. from 15th Ave. to 26th Ave., and 15th Ave. from 118th St. to 125th St.

In Corona the shopping district is Jackson Ave. from 26th St. to 32d St.

In Astoria the main channel of retail trade is along Fulton Ave., Main St. and Astoria Ave.

Long Island City, at Vernon Ave. from Borden Ave. to Mott Ave., and Jackson Ave. from Borden Ave. to Barn St.

Ridgewood, at Metropolitan Ave. from Newtown Creek to Collins Ave., Grand St. from Newtown Creek to Broad St.

Far Rockaway, at Rockaway Boulevard from 25th St. to Mott Ave., and Mott Ave. from Regina Boulevard to 20th St.

The possibilities of sales promotion in New York City are unrivalled. The manufacturer has represented in this single market every advantage for sales creation and every facility for the distribution of his product. The manufacturer need not go beyond the city limits to experiment with or encounter every known difficulty in the promotion of his goods.

Many manufacturers visualize New York City's retail possibilities as centering principally upon Manhattan Island. There are marketing possibilities in each section and the importance of newspaper circulation in each corner of New York City warrants no small amount of investigation.

The merchandising and promotion departments of leading newspapers can furnish in detail many facts and features of each borough which cannot be outlined to their full extent in this limited space.

Principal Shopping Districts of Richmond

In Richmond Borough (Staten Island) there are at least eight retail centers which are increasing in sales possibilities as rapidly as other boroughs of New York City. These centers are Port Richmond, West New Brighton, New Brighton, Tompkinsville, Stapleton, Rosebank, New Dorp and Tottenville. Each of these is a city or town in itself. In fact, the buying characteristics and sales possibilities of each community warrants individual study on the part of the distributor of merchandise.

The above mentioned shopping centers of New York City must not be considered the limits of distribution when planning a sales campaign in this great market. In addition to these centers of retail trade, the advertiser must take into consideration the hundreds of scattered or neighborhood districts. Careful analysis of the market on the part of national advertisers warrants close study of EDITOR & PUBLISHER'S Space Buyers' Chart, together with the accumulation of data from New York City newspapers.

Trading Area

The daily and weekly trading zones were secured after an investigation of the sales, delivery and mail order departments of three of the largest department stores in the city.

This investigation showed that one-third of the parcels mailed were delivered within 50 miles of New York, and slightly less than two-thirds were within 100 and 150 miles.

Seventy and one-half percent of all mailed packages were in the first and second parcel post zones.

The daily zone boundary line extends on the east on Long Island to Long Beach, from which point it swings north through Rockville Center, Garden City, Westbury, Roslyn and Glen Cove. Northeast the furthermost point is Stamford in Connecticut, including Greenwich. To the north the general description would be the whole of Westchester County, which includes, Ossining, Scarboro and Tarrytown on the east bank of the Hudson River, Mount Kisco, Briarcliff, Mount Pleasant, Armonk and Pleasantville inland; on the west bank of the Hudson, Nyack and Piermont. To the northwest the daily zone includes Paterson, Passaic, Hackensack, Arcola, Ridgewood, Park Ridge and Pompton Lake, all in New Jersey.

To the west it reaches its furthermost point at Morristown. Some of the large towns in this district are Newark, Orange, Rutherford, Montclair, Chatham and Bloomfield.

On the south, Perth Amboy and South Amboy, in New Jersey and Tottenville on Staten Island, New York, are the southern points within the daily trading area.

Within this daily zone nearly all the large retail stores in New York City have a daily free delivery system.

The weekly zone area extends to the east as far as West Hampton on the south side of Long Island, then swings north across the Island and includes Manorville and Wading River. In Connecticut it extends to about halfway between Milford and New Haven, within this zone is Bridgeport, Milford, South Norwalk and Norwalk. This zone swings northwest including Danbury, Brookfield and Newton. The furthermost point north is Chelsea on the Hudson River, which is about midway between Beacon and Poughkeepsie

From this point on the east bank of the Hudson the weekly zone carries west. Included in this district is Newburgh, Cornwall, Highland Falls, West Point, Gardner Town, Walden and Middletown, which is in the general direction northwest from New York City.

The zone now swings southwest to Port Jervis, and is the furthest point in the weekly zone northwest of New York City. On the west the territory extends to a point beyond Hackettstown, this district includes Stillwater, Stanhope, Lebanon and Clinton, all in New Jersey.

On the Southwest the weekly zone extends as far as Trenton, and, swinging in a half circle and then east, we come to the Atlantic Coast, with the furthest point just south of Point Pleasant. This includes Sea Girt, Lake Como, Ocean Grove, Asbury Park and Long Beach.

New York, America's Greatest Jewish City

The Forward

America's Largest Jewish Daily

Contemplate 1,643,000 men, women, children. Visualize their daily needs of food, clothing, shoes and all other things essential to life's daily comforts. Think of the thousands of Jewish retail stores that cater exclusively to the three hundred thousand Jewish families, think of the many millions of dollars' worth of goods they absorb and you will realize that here is a ready and receptive market, of vast virgin territory, concentrated, compact, easily merchandised.

It will cost but a fraction of the advertising appropriation to cover this market, and with the sales cooperation the Forward Merchandising department renders to its advertisers there is every assurance of a successfully productive campaign.

The Forward is America's largest Jewish home paper, is read by approximately half the total Yiddish reading population and is admitted to be the most dominant force in the life of American Jewry.

We shall be pleased to submit to any advertiser a detailed merchandising-advertising plan which has been used very successfully by other national advertisers.

Asheville, North Carolina

A City of Wealth and Class

There is no other city of comparable size the country over with more palatial homes or hotels.

This is reflected in the high grade merchandise in Asheville's stores.

Aside from local manufacturing, wholesaling, retailing, farming, fruit growing and stock raising, the "crop" most indicative of the territory is the "tourist crop" yielding millions of dollars a year.

ASHEVILLE IS NATURALLY A MORNING PAPER CITY

Asheville is isolated high in the Blue Ridge mountains of southwestern North Carolina. It is so situated that papers from other cities cannot get in until the news is stale. And no evening paper in Asheville can get far out into the territory until the next morning.

The Asheville (Morning) Citizen has this natural advantage in addition to its news and feature services and sound management which combine to make it one of the south's most representative newspapers.

North Carolina

is the most *substantially progressive* of all Southern States, paying more Federal taxes than ALL OTHERS combined, Texas excluded.

Charlotte

is the center of the most prosperous and progressive section of the Carolinas—the Piedmont plateau. Charlotte is the center and the home of the world's largest hydro-electric development. More textile mills are located within 100 miles of Charlotte than in any like territory. Charlotte has a population exceeding 65,000; more than 600,000 people live within a radius of 50 miles and more than 2,000,000 live within a hundred mile radius. This happy and prosperous throng of buyers reaches Charlotte over four railroads and eight hard-surfaced highways—the kind for which North Carolina is noted.

The Charlotte News

published week-day afternoons and Sunday mornings, is the heart of Charlotte, the heart of the Carolinas.

More people in Charlotte pay for The News than pay for city water.

Merchants who are on the spot and know the field place the bulk of their advertising with The News.

The News offers you more than 10,500 city circulation; more than 17,000 week-days and more than 18,000 Sundays.

But don't accept these figures without getting the latest information, for The News is growing so rapidly that "magazine" advertising giving circulation figures is obsolete before it comes from the press. You can address:

The Durham Morning Herald

DURHAM • NORTH CAROLINA

Offers 100% Coverage Of Piedmont North Carolina's Key Market

The Market—Durham is the recognized *Center of Industry and Education* in North Carolina. Here are located the world's largest Tobacco, Hosiery, and Cotton Sheeting factories. Durham's industrial pay-roll ranks second among the cities of the Carolinas.

Durham is the home of *Duke University*—endowed with Seventy Million Dollars. A $17,000,000 enlargement program is now in progress on the campus. The great University of North Carolina is located eleven miles from Durham and is connected with Durham by a concrete boulevard.

Durham's building permits in the month of September ranked fifth in the entire South.

Durham has a population of 42,258 (U. S. Census Bureau), and is the fourth city in size in North Carolina. Durham is the richest city, per capita, in the Carolinas. Durham has everything that a good market for advertised products should have.

The Medium—The Durham Morning Herald has more home-delivered (carrier) city circulation than any other morning daily in the Carolinas. By covering its own field to the point of saturation The Herald has made Durham void of coverage by outside newspapers.

During the first nine months of 1925 The Herald published 84c out of every dollar's worth of *Local* advertising placed with Durham's newspapers. The Herald, in the same period, published 313% more *National* advertising than the second paper.

The Herald is the only Associated Press paper in Durham, and is the only Durham member of the Audit Bureau of Circulations.

The Herald enjoys a prestige in the Durham territory unlike that of any other newspaper. It offers the only vehicle for reaching the homes of Piedmont North Carolina's Key Market.

MINOT, N. DAK.

(Ward County)

1920 Population, 10,476. (1925, 12,245.)
City and Suburban Estimate, 16,500.
Families, 2,735.
Schools: Public Grade, 6; High, 1; Junior High, 1; Parochial, 1; Number of Pupils, 3,600.
Churches: Baptist, 1; Christian Science, 1; Congregational, 1; Episcopal, 1; Hebrew, 1; Methodist, 1; Presbyterian, 1; Roman Catholic, 1; Miscellaneous, 5 Lutheran and 7 others.

Banks: National, 2; State, 2.

Theatres: Legitimate, 1; Moving Pictures, 3; Miscellaneous (Auditoriums, etc.), 1. Total number of seats, 2,850.

Location: Center of northwest North Dakota, a vast agricultural empire with great deposits of lignite coal which are rapidly being developed. To nearest larger city (Grand Forks), by railroad, 6 hours; by auto, 7½ hours.

Principal Industries: Railroad shops, auto repair, flour mills, creameries, lignite, briquetting plant. Because of the city's vast trading territory, retail and wholesale establishments are very important factors in the community. The briquetting industry is just starting and promises vast development because of the absence of fuel elsewhere in the northwest. There are 600,000,000,000 (billion) tons of lignite coal in western North Dakota.

Manufacturing Establishments: 6. Leading firms: Russell-Miller Milling Co., and Minot Flour Mills, also Armour Creameries, White Ice Cream Co., and Purity Ice Cream Co.

Special Information: With agriculture becoming a more stable industry and the fertile, low-priced land of northwest North Dakota affording opportunities to renters from states suffering land value inflation, northwest North Dakota can see the beginning of an influx of new settlers. As the territory develops, Minot grows for the section of a network of railroad branches and federal highways which center into Minot. It offers leadership to the entire northwestern part of the state and is a commercial center for this section. It is also becoming outstanding dairy center.

Residential Features: Minot is the business center of northwest North Dakota and is located in the Mouse River Valley. It is recognized as a city of fine residences, parks and good schools. It is one of the most attractively laid out cities of its size in the West. It is a terminal of the Great Northern Railway and a junction point of this road and the Soo line, two very important railroads. The vast lignite deposits of northwest North Dakota are near Minot. The city has 2,800 homes.

Retail Shopping Section: Main Street, four blocks; Central Avenue, four blocks; First Street, S. E., two blocks; First Street, S. W., two blocks; First Avenue, S. W. & S. E., three blocks.

Trading Area: Minot is the largest city in northwest North Dakota, a territory that has 581 miles of federal highway which are open winter and summer. This gives the city a trading territory extending from Harvey and Rugby on the east, west into the eastern part of Montana and north into the southern part of Saskatchewan. The city's territory is about 225 miles wide and 125 miles north and south, with Minot in the very center.

Wholesale Houses: Groceries, 4; meats, 1; fruits, 3; miscellaneous lines, lumber, 2; building material, 2; tires, 3; creameries, 3; flour mills, 3.

Number of Retail Outlets for Nationally Advertised Products: Passenger automobile agencies, 17; commercial automobile agencies, 4; automobile accessories, 5; automobile tire agencies, 4; bakers, 4; cigar stores and stands (including hotels), 13; confectioners (including hotel stands), 9; delicatessen, 2; dressmakers, 15; druggists, 5; dry goods, 5; department stores, 6; electrical supplies, 4; florists, 2; fruits, 4; furniture, 5; furriers, 1; garages (public), 16; grocers, 35; hardware, 4; jewelry, 4; meat markets, 12; men's furnishings, 12; men's clothing, 13; merchant tailors, 6; milliners, 7; opticians, 5; photographers, 5; pianos (and miscellaneous musical instruments), 3; radio supplies, 3; restaurants (including hotels), 20; shoes, 4; sporting goods, 3; stationers, 3; women's apparel, 6.

In Cleveland and Northern Ohio
The Plain Dealer *has the* BUYERS

"Cleveland's Three Million Market," a book full of facts and figures about Northern Ohio and how to sell it, will be mailed to you upon receipt of a request on your business stationery. Address National Advertising Department.

—the people with the money to spend and the inclination to spend it—

For years and years the Cleveland Plain Dealer has appealed to that great prosperous group of Northern Ohio people who enjoy and believe in a GOOD newspaper. With women taking the same keen interest in affairs that men do, in the buying news as well as the topical, they demand that this morning newspaper stay in the home.

In Cleveland and Northern Ohio they read the Plain Dealer EVERY day. In fact, nine out of ten home-delivered Plain Dealers remain in the home all day for the women to read. That should interest all national advertisers.

It does interest many—over half the national advertisers using Cleveland newspapers restrict their message to Northern Ohio buyers to the Plain Dealer ALONE.

Invariably these advertisers have obtained sufficient dealer-distribution and aroused unusual reader-interest to justify their good judgment. For year after year the Plain Dealer carried **more** national advertising than ALL other Cleveland newspapers **combined.**

In this great Northern Ohio area of manufacturing centers, prosperous farms, good roads and industrial activity are 3,000,000 prosperous people. They can be reached and sold through the Plain Dealer ALONE. No other medium taps this great market.

Location

Cleveland is situated on the south shore of Lake Erie at the mouth of the Cuyahoga River. It is one of the largest inland ports. Ten miles of docks along the Cuyahoga River handle the immense tonnage of iron from the Great Lakes regions, 60 per cent of which comes through this port. There is 14 miles of lake front protected by a breakwater 6 miles in length. There are eight grain elevators and six ore docks.

The railroads, ten in number, are parts of or allied with the country's most important systems. They are Baltimore & Ohio, Nickel Plate, Toledo & Ohio Central, Wheeling & Lake Erie, Hocking Valley, New York Central, Pennsylvania, Erie, Big Four, Lake Erie & Western.

Each has its own terminal excepting the New York Central, Pennsylvania and Big Four, which together share the Union Depot.

All the above named railroads are connected by means of the Cleveland Short Line R. R., a belt line making a circuit of 19 miles around the city, intersecting each railroad at or near a freight yard, making it just that much easier for the switching and transferring of freight from one line to the other.

Five interurban lines operate in all directions to points as distant as Toledo.

There are three bus lines to Akron, two to Youngstown, others to Ashtabula, Conneaut, Warren, Elyria and Toledo, Lorain and Sandusky, Elyria, Medina, Beres and Lorain.

Eleven improved highways furnish easy access by motor to the surrounding sections.

Overnight vessel freight service to Detroit and Buffalo is given daily except during winter months by boats of the Detroit and Cleveland Navigation Co., and Cleveland & Buffalo Transit Co. The Great Lakes Transit Corp. also provides daily sailings to Chicago, Duluth and all intervening points on the Great Lakes. Two Canadian lines give frequent service.

Principal Industries

A total of about 3,000 establishments operate in Cleveland according to the 1920 Census of Manufacturers.

More than 14,000 different articles are manufactured.

The value of the products produced is estimated at over one billion, one hundred million dollars annually.

Approximately 180,000 wage earners are employed—160,000 male, 20,000 females—more than one-fifth of the wage earners of all Ohio.

More than $275,000,000 were expended in salaries and wages by manufacturers in 1919.

The industries of Cleveland, in order of their importance, are iron and steel, foundry and machine shop, automobiles, women's clothing, slaughtering and meat packing, printing and publishing, bread and bakery products, confectionery, cars and car shops, stoves and furnaces. Other products are boxes, brass and bronze, bricks and tile, chemicals, wooden goods, steel barrels, cutlery and tools, copper, tin, sheet iron, electrical mailing apparatus and supplies, furniture, refrigerators, gas and electric fixtures, lamps and reflectors, knit goods, hosiery, leather and leather goods, lumber, millinery, lace goods, patent medicines, tobacco and auto parts.

Manufacturing Establishments

Some of the larger firms, with the number of employees, are: American Steel & Wire Co., 7,500; White Motor Co., 6,000; Bourne Fuller, 4,500; Fisher Body Co., 4,000 (this is the largest single body plant in the world); Sherwin-Williams, National Acme, National Malleable Castings Co., Warner & Swasey, Nela Park, the experimental laboratory of the General Electric Co.; Cleveland Hardware Co., Chandler Motor Co., Cleveland Twist Drill Co., Cleveland Metal Products Co., Brown Hoisting Machinery Co., Printz-Biederman (women's cloaks and suits), Joseph & Feiss (men's clothing), Peerless Motor Co., Van Dorn Iron Works, Jordan Motor Co., Glidden Varnish, F. B. Stearns Co., The Cleveland Automobile Co., Baker R. & L. Co., The Rubay Co., The Rollin Motors Co.

Special Information

Cleveland's geographical location makes this city the meeting point of the coal from Ohio, Pennsylvania and West Virginia. The iron ore of the Great Lakes and the limestone quarries of Ohio tend to make this one of the greatest iron and steel markets in the world.

Cleveland outranks all American cities in the manufacture of nuts, bolts, wire, wire nails, malleable iron castings, steel forgings, vapor stoves, plumber supplies and electric carbon. It is the second city in America in variety of manufactures. It is second to New York in ready-to-wear clothing. There are 35 manufacturers in Garment Association. The value of clothing manufactured yearly is $50,000,000. Between five and six thousand are engaged in this industry.

Value of leading Cleveland manufactures and percentage of the manufactures in comparison with rest of state. In the county in which Cleveland is located there are 120,000 passenger automobiles registered in 1923; 1922 registration was 93,700. There are 23,000 trucks in 1923 registered, and 18,500 in 1922.

Residential Features

The fashionable residential sections of Cleveland are on par with those of any city in the country. The older and best known sections in particular Euclid avenue is giving away to trade and the newer sections in East Cleveland, Shaker Heights, Lakewood, Bratenahl are fast developing. The workingmen's homes one-third owned by the occupants are located near the industrial sections.

The workingmen's homes are located for the most part in districts known as Brooklyn, South Brooklyn, South Side, West Side and Collinwood. There are several sections of the city now being developed for the building of four room bungalows and seven room houses, this is for the encouraging of home ownership among wage earners.

Retail Section

The principal shopping district extends from the Public Square which forms the heart of the business section and is at the junction of Superior St., Euclid Ave. and Ontario St. From the Public Square for about 20 blocks on Euclid Ave. is the main business thoroughfare. Prospect and Superior Aves which parallel Euclid on either side are fast developing into retail shopping districts second only to Euclid Ave. On these and intersecting streets will be found merchandise from all parts of the globe.

The following are the principal outlying shopping centers and cannot be confined to the immediate area. The retail section will in some cases extend from two to six or eight blocks on the principal street mentioned.

Euclid Ave. and 55th St., Euclid Ave. and 105th St., St. Clair Ave. and 55th St., St. Clair Ave. and E. 105th St., St. Clair Ave. and E. 152nd St., Superior Ave. and E. 95th St., Superior Ave. and E. 105th St., Payne Ave. and E. 55th St., Hough Ave. and E. 79th St., Central Ave. and E. 55th St., Broadway and E. 55th St., Woodland and E. 55th St., Broadway and E. 93rd St., Detroit Ave. and W. 65th St., Detroit Ave. and W. 79th St., Detroit Ave. and West 117 St., West 25th St. and Lorain Ave., West 25th St. and Denison Ave.

Trading Area

The trading area of Cleveland is contributed to by a large and prosperous manufacturing section in the outlaying districts. Cleveland secures 98 per cent of its retail business in a radius of 35 miles. Good roads and the bus and interurban lines bring many people to this market, but the city does not enjoy a commuter business in proportion to most cities of its size.
